IFRA-Conformity Certificate

The IFRA Standards regarding use restrictions are based on RIFM (Research Institute for Fragrance Materials) Safety Assessments approved by the Expert Panel for Fragrance Safety and verified by the IFRA Risk Management Task Force.

The referenced product bears an IFRA specification.

Symrise considers all aspects of the IFRA Guidelines and best practice relevant to the referenced product. The maximum use level is based on a safety assessment that considers currently available information, both external and internal, pertaining to raw materials and their properties in addition to any evaluation completed by IFRA.

It is the ultimate responsibility of our customers to ensure the safety of the final consumer product placed on the market.

Symrise IFRA certificates reference your specific briefed product application(s) as opposed to an IFRA Category. IFRA Category certificates are available upon request if the product specific certificate is not suitable for your use.

The following IFRA restricted materials are contained:

Cas-No	Substance	%
108-88-3	Toluene content in raw materials	0,0010

According to the IFRA Code of Practice (as reported under the 44th Amendment), due to the potential for certain raw materials to form nitrosamines in nitrosating systems, the presence in the referenced product of any of these substances must be reported to the customer. In accordance with this requirement, we advise you that the referenced product does not contain any of the concerned materials as listed below*.
