Note: “Absent” reproduces the supplier's notation and does not independently establish a laboratory detection limit or a concentration of exactly 0.0000%.

EU COSMETIC ALLERGEN LABELLING

Under Regulation (EC) No. 1223/2009, as amended, relevant fragrance allergens must be declared in the finished cosmetic product when their concentrations exceed:

Product Type	Threshold
Leave-on cosmetic products	0.001%
Rinse-off cosmetic products	0.01%

The percentages in Section 1 refer to the Ambreine Natural fragrance mixture, not the finished cosmetic product.

The finished-product concentration must be calculated from the amount of Ambreine Natural used and any additional contributions from other ingredients.

AROMOLOGY

DECLARATION AND SOURCE LIMITATIONS

This document reproduces the supplier's dedicated allergen analysis.

The separately provided Aromology IFRA annex contains inconsistent entries for Citral and Limonene. These have not been substituted for the values in the dedicated allergen analysis.

The supplier analysis does not establish complete coverage of the expanded allergen list introduced by Regulation (EU) 2023/1545. A current expanded-list declaration should be obtained for EU regulatory use.
