

FRAGRANCE ALLERGEN DECLARATION

In accordance with Regulation (EC) No. 1223/2009 (as amended) – Annex III (EU Cosmetic Regulation)

LEATHER MD 936358

PRODUCT IDENTIFICATION

Item	Details
Product Name	Leather MD
Manufacturer	Firmenich
Manufacturer Product Code	936358
Product Type	Proprietary Fragrance Composition
Physical Form	Liquid
Recommended Use	Professional fragrance formulation and manufacture
CAS Number	Not applicable – proprietary mixture

Leather MD is identified by Firmenich as a proprietary fragrance ingredient. Its complete composition and exact component concentrations are protected as trade-secret information.

REGULATORY BASIS

This declaration has been prepared with reference to:

- Regulation (EC) No. 1223/2009 on cosmetic products.
- Regulation (EU) 2023/1545 concerning the labelling of fragrance allergens in cosmetic products.
- Available Firmenich Safety Data Sheet information for Leather MD, product code 936358.

DECLARED EU FRAGRANCE ALLERGENS

Based on the available Firmenich Safety Data Sheet, the following EU-regulated fragrance allergens are identified in the product:

EU Fragrance Allergen	CAS Number	Concentration Reported in Available SDS
Isoeugenol	97-54-1	≥0.1% to <0.5%
Eugenol	97-53-0	≥0.1% to <0.5%
Cinnamal	104-55-2	>0% to <0.1%

The available Firmenich SDS lists isoeugenol within the range of 0.1% to below 0.5%. It also lists eugenol at 0.1% to below 0.5% and cinnamal below 0.1%.

OTHER ALLERGENS

Parameter	Declaration
Other intentionally added EU fragrance allergens	Not confirmed from the available documentation
Complete allergen composition	Proprietary
Exact concentrations	Withheld by the manufacturer as trade-secret information
Batch variation	Possible
Manufacturer documentation	Takes precedence

The absence of an allergen from the table above must not be interpreted as confirmation that it is completely absent. A current, product-specific Firmenich allergen declaration is required for definitive quantitative regulatory assessment.

COSMETIC LABELLING THRESHOLDS

An individual regulated fragrance allergen must generally be declared in the finished cosmetic product when its concentration exceeds:

Finished Cosmetic Product	Labelling Threshold
Leave-on products	0.001%
Rinse-off products	0.01%

The concentration of each allergen in the finished product must be calculated using the actual dosage of Leather MD and the current quantitative allergen data supplied by Firmenich.

CALCULATION GUIDANCE

The maximum theoretical allergen contribution may be calculated as follows:

Allergen concentration in finished product = Leather MD dosage × allergen concentration in Leather MD

For regulatory calculations, the upper value of the disclosed concentration range should be used unless an exact manufacturer-certified value is available.

CONCLUSION

Based on the available Firmenich Safety Data Sheet, Leather MD contains Isoeugenol, Eugenol and Cinnamal, which are subject to EU cosmetic fragrance-allergen labelling requirements.

This declaration does not replace the current official allergen certificate issued by Firmenich. The latest manufacturer-issued quantitative allergen declaration and batch documentation shall always take precedence.
