DECLARATION OF CONFORMITY

Aromology declares that Natural Aldehyde C-10 does not contain any declarable fragrance allergens listed in Annex III of Regulation (EC) No. 1223/2009 based on the available supplier documentation and product information.

As this material is a naturally derived isolate, extremely low levels of trace constituents originating from the natural botanical source may vary between production batches. No Annex III fragrance allergens are expected to be present at concentrations requiring declaration under Commission Regulation (EU) 2023/1545.

The responsibility for determining the final allergen declaration requirements remains with the manufacturer of the finished cosmetic or fragrance formulation. The supplied declaration provides the same qualification regarding naturally occurring trace constituents and finished-product responsibility.
