Anisyl Nitrile

PRODUCT INFORMATION

Product Name: Anisyl Nitrile
Chemical Name: 4-Methoxybenzonitrile

CAS Number: 874-90-8
EC / EINECS Number: 212-871-6
Molecular Formula: C₈ H₇ NO

Manufacturer: Synarome
Product Type: Aroma Chemical

REGULATORY REFERENCE

Regulation (EC) No. 1223/2009, including the expanded fragrance-allergen requirements introduced by Commission Regulation (EU) 2023/1545.

EXPANDED EU FRAGRANCE ALLERGEN ASSESSMENT

Anisyl Nitrile is chemically identified as 4-Methoxybenzonitrile (CAS 874-90-8).

Based on the identity of the neat substance, Anisyl Nitrile itself is not one of the named fragrance allergens requiring individual ingredient declaration under the EU fragrance-allergen labelling list.

However, in the absence of a batch-specific quantitative Synarome allergen declaration, Aromology does not certify analytically proven zero concentrations for possible trace impurities.

Fragrance Allergen	Status
--------------------	--------

Fragrance Allergen	Status
Limonene	Not intentionally added / no quantified content established
Linalool	Not intentionally added / no quantified content established
Citral	Not intentionally added / no quantified content established
Citronellol	Not intentionally added / no quantified content established
Geraniol	Not intentionally added / no quantified content established
Eugenol	Not intentionally added / no quantified content established
Isoeugenol	Not intentionally added / no quantified content established
Coumarin	Not intentionally added / no quantified content established
Benzyl Alcohol	Not intentionally added / no quantified content established
Benzyl Benzoate	Not intentionally added / no quantified content established
Benzyl Salicylate	Not intentionally added / no quantified content established
Farnesol	Not intentionally added / no quantified content established

FINISHED-PRODUCT LABELLING THRESHOLDS

Finished Cosmetic Type	Individual Allergen Threshold
Leave-On Products	>0.001%
Rinse-Off Products	>0.01%

These are the same finished-product threshold fields used in your Aromology allergen certificate.

DECLARATION

Anisyl Nitrile is a single aroma chemical identified as 4-Methoxybenzonitrile, CAS 874-90-8.

Based on the chemical identity and information available, the substance itself is not identified as a named EU fragrance allergen requiring individual declaration under the applicable fragrance-allergen labelling provisions.

No listed fragrance allergens are intentionally added based on the product identity reviewed. However, this declaration should not be interpreted as analytical confirmation of absolute zero trace content in a particular manufacturing batch. Where exact quantitative concentrations are required for cosmetic safety assessment, a current manufacturer or batch-specific quantitative allergen declaration should be used.
