### Camphor Essential Oil

---

#### PRODUCT INFORMATION

**Product Name:** Camphor Essential Oil  
**Botanical Name:** Cinnamomum camphora  
**INCI Name:** Cinnamomum Camphora (Camphor) Wood Oil

**Product Code:** PE01028  
**CAS Numbers:** 8008-51-3; 92704-03-5

---

#### DECLARATION BASIS

This declaration reproduces the maximum percentages of naturally occurring fragrance allergens stated in the supplied product-specific allergen document.

The supplied declaration covers the original list of 26 fragrance allergens under the former EU Cosmetics Directive 76/768/EEC framework.

Important: The supplied document does not provide a complete assessment of the additional fragrance allergens introduced under Commission Regulation (EU) 2023/1545. It therefore cannot, on its own, establish full compliance with the expanded EU fragrance-allergen labelling requirements.

#### FRAGRANCE ALLERGEN COMPOSITION

| Fragrance Allergen     | CAS Number | Maximum Inclusion Level (%) |
|------------------------|------------|-----------------------------|
| Alpha-Isomethyl Ionone | 127-51-5   | —                           |
| Amyl Cinnamal          | 122-40-7   | —                           |
| Amylcinnamyl Alcohol   | 101-85-9   | —                           |

|                                                      |            |       |
|------------------------------------------------------|------------|-------|
| Anisyl Alcohol (Anise Alcohol)                       | 105-13-5   | —     |
| Benzyl Alcohol                                       | 100-51-6   | —     |
| Benzyl Benzoate                                      | 120-51-4   | —     |
| Benzyl Cinnamate                                     | 103-41-3   | —     |
| Benzyl Salicylate                                    | 118-58-1   | —     |
| Butylphenyl Methylpropional (Lilial)                 | 80-54-6    | —     |
| Cinnamal (Cinnamic Aldehyde)                         | 104-55-2   | —     |
| Cinnamyl Alcohol                                     | 104-54-1   | —     |
| Citral                                               | 5392-40-5  | —     |
| Citronellol                                          | 106-22-9   | —     |
| Coumarin                                             | 91-64-5    | —     |
| Eugenol                                              | 97-53-0    | —     |
| Farnesol                                             | 4602-84-0  | —     |
| Geraniol                                             | 106-24-1   | —     |
| Hexyl Cinnamal                                       | 101-86-0   | —     |
| Hydroxycitronellal                                   | 107-75-5   | —     |
| Hydroxyisohexyl 3-Cyclohexene Carboxaldehyde (Lylal) | 31906-04-4 | —     |
| Isoeugenol                                           | 97-54-1    | —     |
| Limonene                                             | 5989-27-5  | 25.0% |
| Linalool                                             | 78-70-6    | 0.5%  |
| Methyl 2-Octynoate                                   | 111-12-6   | —     |
| Evernia Furfurea (Treemoss) Extract                  | 90028-67-4 | —     |
| Evernia Prunastri (Oakmoss) Extract                  | 90028-68-5 | —     |

Notation: A dash (—) reproduces the original declaration. The source does not define it as a measured zero or provide a detection limit; it must not be interpreted as proof of absence.

#### IDENTIFIED FRAGRANCE ALLERGENS

Limonene: 25.0%

Maximum concentration in the supplied raw-material declaration

Linalool: 0.5%

Maximum concentration in the supplied raw-material declaration

These are maximum inclusion levels stated for Camphor Essential Oil, not measured concentrations in any particular finished perfume or cosmetic product.

#### EU COSMETIC ALLERGEN LABELLING THRESHOLDS

The supplied declaration states the following thresholds for individually listed fragrance allergens in finished cosmetic products:

| Product Type       | Declaration Threshold   |
|--------------------|-------------------------|
| Leave-On Products  | Exceeds 0.001% (10 ppm) |
| Rinse-Off Products | Exceeds 0.01% (100 ppm) |

### Finished-Product Calculation

The maximum allergen contribution from this essential oil can be calculated as:

Allergen concentration in finished product (%) = Essential oil concentration in finished product (%)  
× Allergen concentration in essential oil (%) ÷ 100

For example, at 1% Camphor Essential Oil in a finished product, the maximum contribution calculated from the supplied declaration would be:

| Allergen | Calculated Maximum in Finished Product |
|----------|----------------------------------------|
| Limonene | 0.25%                                  |
| Linalool | 0.005%                                 |

These are illustrative calculations, not analytical results for a finished formulation. Contributions from other ingredients must also be considered.

### DECLARATION STATEMENT

Based on the supplied product-specific allergen declaration, Camphor Essential Oil contains the following reported fragrance allergens at the stated maximum inclusion levels:

Limonene — 25.0%  
Linalool — 0.5%

The remaining entries in the original 26-allergen table are marked with a dash and have no quantified concentration in the supplied document.

The data should be used together with the complete finished-product formulation when assessing cosmetic ingredient labelling.

Expanded EU Allergen Assessment: Not established by the supplied 26-allergen declaration. Additional product-specific composition information is required to assess allergens introduced under Regulation (EU) 2023/1545.
