Isobutavan

PRODUCT INFORMATION

Product Name: Isobutavan
Manufacturer: Givaudan
Chemical Name: 4-Formyl-2-methoxyphenyl 2-methylpropanoate
Synonym: Vanillin Isobutyrate

CAS Number: 20665-85-4
EC Number: 243-956-6
FEMA Number: 3754

Product Type: Synthetic Aroma Chemical / Perfumery Raw Material

The chemical identity and identifiers are independently confirmed by Givaudan and current technical documentation.

REGULATORY REFERENCE

This declaration is prepared with reference to:

Regulation (EC) No. 1223/2009 on Cosmetic Products

Commission Regulation (EU) 2023/1545

Annex III – Fragrance Allergen Labelling Requirements

EU FRAGRANCE ALLERGEN STATUS

Based on the available product-specific documentation for **Isobutavan, CAS 20665-85-4**, no restricted fragrance allergenic materials are reported for this product.

A current Isobutavan allergen declaration states:

NO RESTRICTED MATERIALS FOUND FOR THIS PRODUCT

Independent fragrance-material data likewise report that Isobutavan does not contain an allergen.

ALLERGEN SUMMARY

Parameter	Status
Declarable Fragrance Allergens Identified	None Identified
Restricted Allergenic Materials Identified	None
Added Fragrance Allergens Identified	None
Material Type	Synthetic Aroma Chemical
Primary Substance	Vanillin Isobutyrate
CAS Number	20665-85-4

EU ALLERGEN DECLARATION

Fragrance Allergen Status	Result
Annex III fragrance allergens identified in available product documentation	None Identified
Allergen declaration required from Isobutavan itself	No
Added declarable fragrance allergens	None Identified

EU COSMETIC LABELLING THRESHOLDS

Where a regulated fragrance allergen is present in the finished cosmetic product, the applicable declaration threshold is:

Product Type	Labelling Threshold
Leave-On Products	>0.001% (10 ppm)
Rinse-Off Products	>0.01% (100 ppm)

These thresholds apply to the concentration of the relevant regulated allergen in the finished cosmetic product, not simply to the concentration of Isobutavan as a raw material.

DECLARATION OF CONFORMITY

Aromology declares that, based on the available product-specific documentation and chemical identity for:

ISOBUTAVAN – GIVAUDAN

Chemical Name: 4-Formyl-2-methoxyphenyl 2-methylpropanoate

CAS Number: 20665-85-4

no declarable fragrance allergens are identified as constituents of the material in the available documentation.

The material is a synthetic aroma chemical used primarily for its sweet, creamy, vanillic and white-chocolate character. Givaudan describes Isobutavan specifically as having a creamy vanillic character reminiscent of white chocolate, cream soda and soft apricot.

The manufacturer of the finished cosmetic or fragrance product remains responsible for determining the final allergen concentration and applicable labelling requirements for the complete formulation.
