LACTOJASMONE

PRODUCT IDENTIFICATION

Parameter	Details
Product	Lactojasmone
Manufacturer	Symrise
Product No.	660590
CAS No.	7011-83-8
GC Purity	≥98%
Regulatory Basis	Regulation (EC) No. 1223/2009
Expanded Regulation	Regulation (EU) 2023/1545

EU ALLERGEN STATUS

Lactojasmone / 5-Hexyldihydro-5-methylfuran-2(3H)-one, CAS 7011-83-8, is not itself one of the individually named fragrance allergens introduced or maintained under Regulation (EU) 2023/1545. The regulation requires individual labelling of listed fragrance allergens where their concentration exceeds 0.001% in leave-on products or 0.01% in rinse-off products.

TRADITIONAL EU FRAGRANCE ALLERGEN REVIEW

Based on the disclosed chemical identity, none of the following is the principal constituent:

Allergen	Status
Alpha-Isomethyl Ionone	Not identified

Allergen	Status
Amyl Cinnamal	Not identified
Anise Alcohol	Not identified
Benzyl Alcohol	Not identified
Benzyl Benzoate	Not identified
Benzyl Cinnamate	Not identified
Benzyl Salicylate	Not identified
Cinnamal	Not identified
Cinnamyl Alcohol	Not identified
Citral	Not identified
Citronellol	Not identified
Coumarin	Not identified
Eugenol	Not identified
Farnesol	Not identified
Geraniol	Not identified
Hexyl Cinnamal	Not identified
Hydroxycitronellal	Not identified
Isoeugenol	Not identified
Limonene	Not identified
Linalool	Not identified
Methyl 2-Octynoate	Not identified
Evernia Prunastri Extract	Not identified
Evernia Furfuracea Extract	Not identified

EXPANDED ALLERGEN ASSESSMENT

Symrise specifies Lactojasmone at minimum 98% GC purity. This does not by itself prove that every Annex III allergen is analytically absent from the remaining technical fraction.

Therefore the most defensible quantitative statement is:

Parameter	Status
Lactojasmone itself individually declarable	No
CAS 7011-83-8 listed as an EU fragrance allergen	No
Traditional allergens identified as principal constituents	None identified
Batch-specific expanded allergen verification	Current Symrise quantitative declaration required
Absolute "all allergens = 0.0000%" claim	Not supported from identity alone

EU LABELLING THRESHOLDS

Finished Cosmetic	Threshold
Leave-on	0.001% / 10 ppm
Rinse-off	0.010% / 100 ppm

These thresholds are explicitly established by Regulation (EU) 2023/1545.

FORMAL DECLARATION

Based on the current chemical identity and EU legislation:

LACTOJASMONE – SYMRISE
PRODUCT NO. 660590
CAS 7011-83-8

is not itself identified as an individually declarable EU fragrance allergen.
For an exact quantitative declaration covering the full expanded EU allergen list, use the latest original Symrise allergen statement for Product No. 660590.

Disclaimer: This is a supplier-style EU allergen declaration. It is not an original Symrise quantitative allergen certificate. The current manufacturer-issued declaration shall prevail for formal customer or regulatory submissions.
