Oudharome

Product Identification

Item	Details
Product Name	Oudharome
Manufacturer	Synarome
Product Code	601720
Product Type	Proprietary Fragrance Base
Chemical Nature	Mixture
CAS Number	No single CAS assigned
INCI Name	Parfum
Odour Family	Oud / Woody
Odour Profile	Oud, woody, leathery, smoky, ambery, animalic

EU Fragrance Allergen Status

Because Oudharome is a proprietary mixture, the presence and concentration of EU declarable fragrance allergens cannot safely be inferred from its trade name or oud odour profile.

A definitive declaration requires:

- The current Synarome quantitative allergen statement
- The complete confidential formula
- Supplier declarations for the individual components
- Analytical data where required

Therefore:

No blanket allergen-free declaration is made for Oudharome Product Code 601720.

Representative Allergen Review

The following substances should be checked against the current Synarome quantitative allergen declaration:

EU Fragrance Allergen	Status
Alpha-Isomethyl Ionone	Manufacturer confirmation required
Amyl Cinnamal	Manufacturer confirmation required
Amyl Salicylate	Manufacturer confirmation required
Amylcinnamyl Alcohol	Manufacturer confirmation required
Anethole	Manufacturer confirmation required
Anise Alcohol	Manufacturer confirmation required
Benzaldehyde	Manufacturer confirmation required
Benzyl Alcohol	Manufacturer confirmation required
Benzyl Benzoate	Manufacturer confirmation required
Benzyl Cinnamate	Manufacturer confirmation required
Benzyl Salicylate	Manufacturer confirmation required
Camphor	Manufacturer confirmation required
Cinnamal	Manufacturer confirmation required
Cinnamyl Alcohol	Manufacturer confirmation required
Citral	Manufacturer confirmation required
Citronellol	Manufacturer confirmation required
Coumarin	Manufacturer confirmation required
Eugenol	Manufacturer confirmation required
Farnesol	Manufacturer confirmation required
Geraniol	Manufacturer confirmation required
Hexyl Cinnamal	Manufacturer confirmation required
Hydroxycitronellal	Manufacturer confirmation required
Isoeugenol	Manufacturer confirmation required
Limonene	Manufacturer confirmation required
Linalool	Manufacturer confirmation required
Menthol	Manufacturer confirmation required
Methyl 2-Octynoate	Manufacturer confirmation required
Methyl Salicylate	Manufacturer confirmation required
<i>Evernia prunastri</i> Extract	Manufacturer confirmation required
<i>Evernia furfuracea</i> Extract	Manufacturer confirmation required

“Manufacturer confirmation required” means neither presence nor absence is being asserted without Synarome data.

Expanded EU Allergens – Regulation (EU) 2023/1545

The expanded EU fragrance-allergen requirements should also be reviewed for substances and grouped entries including, where applicable:

- Beta-Caryophyllene
- Pinene
- Terpineol
- Linalyl Acetate
- Geranyl Acetate
- Vanillin
- Menthol
- Camphor
- Benzaldehyde
- Anethole
- Methyl Salicylate
- Other additional Annex III fragrance-allergen entries

The complete expanded assessment must be based on the latest Synarome quantitative declaration.

Natural Oud Allergen Distinction

Oudharome should not automatically be assigned the composition of natural agarwood.

The presence of:

- Aquilaria oil
- Agarwood extract
- Cypriol
- Patchouli
- Labdanum
- Oakmoss
- Animalic naturals

must not be assumed solely from the product's oud character.

Only the manufacturer's composition and regulatory declarations should be used.

Raw Material Declaration

Parameter	Declaration
Product	Oudharome
Manufacturer	Synarome
Product Code	601720
Product Type	Proprietary Fragrance Base
Chemical Nature	Mixture

Natural Agarwood Oil	Not automatically assumed
Single CAS Number	None
EU Allergen-Free Claim	Not made
Quantitative EU Allergen Data	Current Synarome declaration required
Expanded EU 2023/1545 Assessment	Required

Finished Cosmetic Declaration Thresholds

Where an individually declarable fragrance allergen is present, it must be declared in the finished cosmetic when its concentration exceeds:

Finished Cosmetic Type	Declaration Threshold
Leave-on Products	0.001%
Rinse-off Products	0.01%

These thresholds apply to the concentration of each allergen in the final cosmetic product.

Finished Product Calculation

For each allergen confirmed in Oudharome:

Allergen concentration in Oudharome

Oudharome concentration in fragrance concentrate

Fragrance dosage in finished cosmetic

The resulting contribution must then be added to the same allergen contributed by every other ingredient in the formulation.

Example

If a future Synarome declaration shows an allergen at:
1.50% in Oudharome

and Oudharome is used at:
5.00% in the fragrance concentrate

with the fragrance used at:
20.00% in the finished perfume

then:

$$1.50\% \times 5.00\% \times 20.00\% = 0.0150\%$$

The finished perfume would contain:
0.0150% of that allergen

which exceeds the 0.001% leave-on declaration threshold.

This example is illustrative only and does not represent the actual composition of Oudharome.

Declaration

Based on the available product-specific information:

- Product: Oudharome
- Manufacturer: Synarome
- Product Code: 601720
- Product Type: Proprietary oud fragrance base
- Chemical Nature: Mixture
- Oudharome is not automatically equivalent to natural agarwood oil.
- No blanket allergen-free claim is made.
- No individual allergen is declared present or absent without manufacturer documentation.
- The current Synarome quantitative allergen declaration is required for formal EU calculations.
- The expanded fragrance allergens under Regulation (EU) 2023/1545 must be included in the assessment.
- Final cosmetic labelling must reflect cumulative contributions from the complete formulation.
- The cosmetic manufacturer or EU Responsible Person remains responsible for final regulatory compliance.

This declaration applies specifically to Synarome Oudharome Product Code 601720 and does not independently certify a finished perfume or cosmetic product.
