EU Fragrance Allergen Status

Gamma-Undecalactone, CAS 104-67-6, was not identified as an individually declarable fragrance allergen in Commission Regulation (EU) 2023/1545. Searches of the regulation for the CAS number and the substance name returned no corresponding Annex III allergen entry.

Accordingly, pure Peach Pure is not itself subject to individual cosmetic ingredient-list declaration as a fragrance allergen solely because it is Gamma-Undecalactone.

Finished Cosmetic Product	Declaration Threshold

Rinse-off cosmetic product	More than 0.01%

Regulation (EU) 2023/1545 retains these thresholds while expanding the number of individually labelled fragrance allergens.

Finished-Product Assessment

The finished cosmetic manufacturer must consider:

- Peach Pure itself
 - All other fragrance ingredients
 - Essential oils and botanical extracts
 - Carriers and solvents
 - Preservatives
 - Colourants
 - Any allergen impurities
 - Cumulative contributions of the same allergen from multiple sources
-

Declaration

Based on the chemical identity and available regulatory information:

- Peach Pure is predominantly Gamma-Undecalactone, CAS 104-67-6.
- Gamma-Undecalactone is not itself listed as an individually declarable EU fragrance allergen.
- No intrinsic EU fragrance allergens are expected in high-purity material.
- No “allergen-free” claim is made for any finished fragrance or cosmetic product.
- Final cosmetic labelling must be determined from the complete formulation.
- The original Givaudan quantitative allergen declaration should take precedence for formal customer submissions.

- The cosmetic manufacturer or EU Responsible Person remains responsible for final compliance.

This declaration applies only to the identified raw material and does not certify a finished cosmetic product.
