Peonile™

Product Identification

Item	Details
Product Name	Peonile™
Manufacturer	Givaudan SA
Chemical Name	Alpha-Cyclohexylidene Benzeneacetonitrile
IUPAC Name	2-Cyclohexylidene-2-phenylacetonitrile
CAS Number	10461-98-0
Product Type	Synthetic Aroma Chemical
Chemical Family	Aromatic Nitrile
Physical Form	Liquid
Odour Profile	Rose, geranium, grapefruit, fresh floral and green

Regulatory Distinction

Peonile™ is subject to an IFRA restriction, but an IFRA restriction and an EU cosmetic-allergen labelling requirement are not the same regulatory measure.

IFRA restricts Peonile because of its safety assessment for dermal sensitisation and systemic toxicity.

Based on the current individually labelled fragrance-allergen entries introduced under the EU Cosmetics Regulation and Regulation (EU) 2023/1545, Peonile itself has not been confirmed as an individually labelled Annex III fragrance allergen requiring declaration under the name “Peonile.”

A current manufacturer allergen declaration should nevertheless be retained for formal customer and finished-product assessments.

EU Fragrance Allergen Assessment

EU Fragrance Allergen	Representative Status
Alpha-Isomethyl Ionone	Not expected
Amyl Cinnamal	Not expected
Amyl Salicylate	Not expected
Amylcinnamyl Alcohol	Not expected
Anethole	Not expected
Anise Alcohol	Not expected
Benzaldehyde	Not expected
Benzyl Alcohol	Not expected
Benzyl Benzoate	Not expected
Benzyl Cinnamate	Not expected
Benzyl Salicylate	Not expected
Camphor	Not expected
Cinnamal	Not expected
Cinnamyl Alcohol	Not expected
Citral	Not expected
Citronellol	Not expected
Coumarin	Not expected
Eugenol	Not expected
Farnesol	Not expected
Geraniol	Not expected
Hexyl Cinnamal	Not expected
Hydroxycitronellal	Not expected
Isoeugenol	Not expected
Limonene	Not expected
Linalool	Not expected
Menthol	Not expected
Methyl 2-Octynoate	Not expected
<i>Evernia prunastri</i> Extract	Not present unless intentionally added
<i>Evernia furfuracea</i> Extract	Not present unless intentionally added
Additional allergens under Regulation (EU) 2023/1545	Original Givaudan quantitative declaration required for definitive confirmation

“Not expected” does not constitute batch-specific analytical proof of absence.

Peonile Raw-Material Status

Parameter	Declaration
Peonile / CAS 10461-98-0	Present as principal material
IFRA-restricted fragrance ingredient	Yes
Individually labelled EU fragrance allergen confirmed from product identity alone	No
Intentionally added botanical essential oils	None expected
Intentionally added natural extracts	None expected
Intentionally added EU Annex III fragrance allergens	None declared
Batch-specific allergen confirmation	Original Givaudan declaration required

Purity and Impurity Qualification

Commercial Peonile™ may contain:

- Principal Peonile component
- Related process impurities
- Trace residual starting materials
- Stabiliser or antioxidant, where declared
- Minor manufacturing by-products

The presence or absence of regulated allergens as trace impurities must be determined from:

- The original Givaudan EU allergen declaration
- Batch-specific specification
- Validated analytical data
- Supplier regulatory statements

This supplier document does not claim analytical absence below laboratory detection limits.

Finished Cosmetic Labelling Thresholds

Where any individually declarable fragrance allergen is present from Peonile or any other ingredient, it must be declared in the finished cosmetic ingredient list when its concentration exceeds:

Finished Cosmetic Product	Declaration Threshold
Leave-on cosmetic product	More than 0.001%
Rinse-off cosmetic product	More than 0.01%

Finished-Product Assessment

The finished cosmetic manufacturer must assess:

- Peonile itself
 - All other aroma chemicals
 - Natural essential oils
 - Botanical extracts
 - Fragrance bases
 - Solvents and carriers
 - Preservatives
 - Antioxidants
 - Trace allergen impurities
 - Cumulative allergen contributions from multiple raw materials
-

Declaration

Based on the available chemical and regulatory information:

- Peonile™ is alpha-cyclohexylidene benzeneacetonitrile, CAS 10461-98-0.
- Peonile is specifically restricted under IFRA 51.
- Peonile has not been confirmed from its identity alone as an individually labelled EU Annex III fragrance allergen.
- No EU fragrance allergen is intentionally declared as an additional component of high-purity Peonile.
- No blanket “allergen-free” claim is made.
- The current Givaudan quantitative allergen declaration should be used for formal regulatory submissions.
- Final cosmetic labelling must be determined from the complete formulation.
- The cosmetic manufacturer or EU Responsible Person remains responsible for final compliance.

This declaration applies only to the identified raw material and does not certify a finished fragrance or cosmetic product.
