Sylvene / Sylvene TEC

Product Identification

Item	Details
Product Name	Sylvene / Sylvene TEC
Manufacturer	Synarome
Product Reference	600504
Product Type	Proprietary Fragrance Specialty
Chemical Nature	Mixture
CAS Number	mixture
Physical Form	Liquid
Colour	Yellow
Odour Profile	Woody, vetiver, cedarwood, powerful

EU Fragrance Allergen Status

Because Sylvene is a proprietary mixture, its EU fragrance-allergen composition cannot reliably be determined from the trade name or odour profile alone.

A definitive quantitative declaration requires:

- The current Synarome EU allergen certificate
- The complete confidential composition
- Regulatory declarations for the components
- Analytical data where applicable

Therefore:

NO BLANKET ALLERGEN-FREE CLAIM IS MADE

for Sylvene Ref. 600504 without current manufacturer evidence.

Representative EU Allergen Review

The following substances should be checked against the current Synarome quantitative allergen declaration:

EU Fragrance Allergen	Status
Alpha-Isomethyl Ionone	Manufacturer confirmation required
Amyl Cinnamal	Manufacturer confirmation required
Amyl Salicylate	Manufacturer confirmation required
Amylcinnamyl Alcohol	Manufacturer confirmation required
Anethole	Manufacturer confirmation required
Anise Alcohol	Manufacturer confirmation required
Benzaldehyde	Manufacturer confirmation required
Benzyl Alcohol	Manufacturer confirmation required
Benzyl Benzoate	Manufacturer confirmation required
Benzyl Cinnamate	Manufacturer confirmation required
Benzyl Salicylate	Manufacturer confirmation required
Camphor	Manufacturer confirmation required
Cinnamal	Manufacturer confirmation required
Cinnamyl Alcohol	Manufacturer confirmation required
Citral	Manufacturer confirmation required
Citronellol	Manufacturer confirmation required
Coumarin	Manufacturer confirmation required
Eugenol	Manufacturer confirmation required
Farnesol	Manufacturer confirmation required
Geraniol	Manufacturer confirmation required
Hexyl Cinnamal	Manufacturer confirmation required
Hydroxycitronellal	Manufacturer confirmation required
Isoeugenol	Manufacturer confirmation required
Limonene	Manufacturer confirmation required
Linalool	Manufacturer confirmation required
Menthol	Manufacturer confirmation required
Methyl 2-Octynoate	Manufacturer confirmation required
Methyl Salicylate	Manufacturer confirmation required
<i>Evernia prunastri</i> Extract	Manufacturer confirmation required
<i>Evernia furfuracea</i> Extract	Manufacturer confirmation required

No zero concentration is assigned without manufacturer evidence.

Expanded Allergens – Regulation (EU) 2023/1545

The current Synarome declaration should additionally be reviewed for the expanded EU allergen list, including where applicable:

- Pinene
- Beta-Caryophyllene
- Terpineol
- Linalyl Acetate
- Geranyl Acetate
- Menthol
- Camphor
- Vanillin
- Benzaldehyde
- Anethole
- Methyl Salicylate
- Other individual or grouped fragrance allergens listed under the amended Annex III

Vetiver and Cedarwood Qualification

The words “Vetiver & Cedarwood” describe Sylvene's odour.

They do not automatically mean that the base contains natural:

- Vetiveria zizanoides root oil
- Juniperus virginiana oil
- Cedrus species oil
- Cedrol
- Vetiverol
- Natural cedarwood fractions

Therefore, allergens naturally associated with those botanical materials should not be attributed to Sylvene without manufacturer confirmation.

Raw Material Allergen Declaration

Parameter	Declaration
Product	Sylvene / Sylvene TEC
Manufacturer	Synarome
Product Code	600504
Chemical Nature	Proprietary Mixture
Synthetic / Compound Base	Yes
Natural Vetiver Oil	Not assumed
Natural Cedarwood Oil	Not assumed

Single CAS Number	None publicly assigned
EU Allergen-Free Claim	Not made
Quantitative EU Allergen Values	Current Synarome declaration required
EU 2023/1545 Expanded Assessment	Required

Finished Cosmetic Declaration Thresholds

Any individually declarable fragrance allergen confirmed in the product must be declared in the finished cosmetic when its concentration exceeds:

Finished Cosmetic Type	Declaration Threshold
Leave-on Products	0.001%
Rinse-off Products	0.01%

Finished Product Calculation

For each confirmed allergen:

Allergen concentration in Sylvene

Sylvene concentration in fragrance

Fragrance dosage in finished cosmetic

The resulting amount must be added to the same allergen contributed by all other ingredients.

Example

If a future Synarome declaration identifies an allergen at:
2.00% in Sylvene

and Sylvene is used at:
5.00% in the fragrance concentrate

with the fragrance used at:
20.00% in a finished perfume

then:

$$2.00\% \times 5.00\% \times 20.00\% = 0.0200\%$$

That finished perfume would contain:
0.0200% of the allergen
which is above the 0.001% leave-on labelling threshold.
This example does not represent Sylvene's actual composition.

Declaration

Based on the available information:

- Product: Sylvene / Sylvene TEC
- Manufacturer: Synarome
- Reference: 600504
- Product Type: Proprietary fragrance specialty
- Odour profile: Woody, vetiver, cedarwood
- The material is treated as a mixture rather than a single aroma chemical.
- The vetiver and cedarwood descriptors do not establish botanical content.
- No blanket EU-allergen-free claim is made.
- Individual allergen concentrations must be taken from the current Synarome quantitative allergen declaration.
- The expanded allergen requirements under Regulation (EU) 2023/1545 must be reviewed.
- Final cosmetic labelling must be calculated using the complete fragrance formulation.
- The cosmetic manufacturer or EU Responsible Person remains responsible for final regulatory compliance.

This declaration applies to Synarome Sylvene Ref. 600504 and does not independently certify a finished perfume or cosmetic product.
