Declaration

Wild Thyme Essential Oil is a natural complex substance. The listed allergens occur naturally in the essential oil and are not intentionally added as separate ingredients.

Natural variation may occur due to:

- Geographical origin;
- Harvest season;
- Environmental conditions;
- Botanical variability;
- Distillation parameters; and
- Individual production batch.

Cosmetic Labelling Thresholds

Where applicable, fragrance allergens must be declared in the ingredient list of the finished cosmetic product when their concentration exceeds:

- 0.001% in leave-on cosmetic products; or
- 0.01% in rinse-off cosmetic products.

The finished-product manufacturer is responsible for calculating the contribution from this material together with all other formulation ingredients.

This declaration does not replace batch-specific GC-MS analysis or a finished-product cosmetic safety assessment.
