Representative EU Fragrance Allergen Declaration

Aurantiol® is a Schiff base produced from Hydroxycitronellal and Methyl Anthranilate. As a high-purity reaction product, it is generally regarded as not containing EU declarable fragrance allergens as free constituents, although residual precursor materials should always be confirmed by the manufacturer's batch documentation. Published technical references describe Aurantiol as containing no fragrance allergens in its finished chemical form.

Declaration

Based on the available published regulatory information:

- Aurantiol® Pure is a high-purity Schiff base fragrance ingredient.
- The principal regulatory consideration is any residual free Hydroxycitronellal, which should be confirmed from the original Givaudan batch-specific allergen declaration.
- Final cosmetic labelling must always be based on the complete fragrance composition and cumulative allergen contribution from all ingredients.
- The cosmetic manufacturer or Responsible Person remains responsible for compliance with Regulation (EC) No. 1223/2009 and Commission Regulation (EU) 2023/1545.
