PRODUCT INFORMATION

Parameter	Details
Product Name	Premium Jasmine Grandiflorum Absolute
Botanical Name	<i>Jasminum grandiflorum</i> L.
INCI Name	Jasminum Grandiflorum (Jasmine) Flower Extract
Extraction Method	Solvent Extraction
Product Type	Natural Complex Substance
Country of Origin	Italy
CAS Number	8022-96-6
EC Number	283-993-5

DECLARATION BASIS

Premium Jasmine Grandiflorum Absolute is a Natural Complex Substance obtained from jasmine flowers.

Its allergen composition may vary according to:

- Flower variety;
- Crop conditions;
- Geographical origin;
- Harvest period;
- Extraction process;
- Concrete composition;
- Alcohol-washing and purification process; and
- Storage conditions.

The information below is representative and does not replace a batch-specific GC/MS report or original producer's allergen declaration.

REPRESENTATIVE EU FRAGRANCE ALLERGEN PROFILE

Fragrance Allergen	CAS Number	Representative Status
Benzyl Alcohol	100-51-6	Naturally present
Benzyl Benzoate	120-51-4	Naturally present
Eugenol	97-53-0	Naturally present
Linalool	78-70-6	Naturally present
Farnesol	4602-84-0	May be naturally present
Geraniol	106-24-1	May occur at low or trace levels
Benzyl Salicylate	118-58-1	Batch dependent
Methyl Salicylate	119-36-8	Batch dependent
Isoeugenol	97-54-1	May occur in trace quantities
Limonene	5989-27-5 / 138-86-3	May occur in trace quantities
Citral	5392-40-5	Not typically expected or trace
Citronellol	106-22-9	Not typically expected or trace
Coumarin	91-64-5	Not typically expected or trace
Anise Alcohol	105-13-5	Not typically expected
Cinnamal	104-55-2	Not typically expected
Cinnamyl Alcohol	104-54-1	Not typically expected
Hexyl Cinnamal	101-86-0	Not expected as a natural major constituent
Hydroxycitronellal	107-75-5	Not expected
Alpha-Isomethyl Ionone	127-51-5	Not expected
Amyl Cinnamal	122-40-7	Not expected
Amylcinnamyl Alcohol	101-85-9	Not expected
Evernia Prunastri Extract	90028-68-5	Not expected
Evernia Furfuracea Extract	90028-67-4	Not expected

A recent supplier declaration for Jasmine Grandiflorum Absolute reported benzyl alcohol at 2.8%, benzyl benzoate at 11.2%, linalool at 7.15% and eugenol at 2.8%; these values illustrate why batch-specific data are required and should not be treated as universal specifications.

EXPANDED EU ALLERGEN REQUIREMENTS

Commission Regulation (EU) 2023/1545 expanded the list of fragrance allergens subject to individual cosmetic labelling requirements.

Batch-specific assessment should therefore include:

- Traditional EU fragrance allergens;
- Newly listed fragrance allergens;
- Naturally occurring derivatives and isomers;
- Oxidation-sensitive terpenes;
- Relevant botanical extract constituents; and

- All contributions from other fragrance materials in the finished product.

EU COSMETIC LABELLING THRESHOLDS

Finished Cosmetic Product Type	Individual Allergen Threshold
Leave-on Products	0.001%
Rinse-off Products	0.01%

The thresholds apply to the concentration of each allergen in the finished cosmetic product.

FINISHED-PRODUCT CALCULATION

Allergen in Finished Product (%) =

Jasmine Absolute Use Level (%) × Allergen Level in Jasmine Absolute (%) ÷ 100

The contribution of the same allergen from every other raw material in the finished formulation must be added.

DECLARATION

Premium Jasmine Grandiflorum Absolute naturally contains fragrance allergens and should not be declared allergen-free.

The most relevant expected allergens include:

- Benzyl Alcohol;
- Benzyl Benzoate;
- Eugenol;
- Linalool; and
- Potentially Farnesol and other batch-dependent constituents.

Final cosmetic labelling must be established using:

- The original producer's batch-specific allergen declaration;
- Batch-specific GC/MS or validated compositional analysis;
- The concentration used in the finished product;
- The contribution from every other formulation ingredient; and
- The applicable EU regulatory transition dates and requirements.

LIMITATIONS

This declaration:

- Applies only to Premium Jasmine Grandiflorum Absolute (Italy);

- Is based on representative natural composition;
- Does not certify exact batch concentrations;
- Does not replace the original producer's allergen certificate;
- Does not determine the complete finished-product ingredient list; and
- Must be reviewed if the source, composition, processing method or legislation changes.
