EU FRAGRANCE ALLERGEN DECLARATION

This declaration has been prepared in accordance with Regulation (EC) No. 1223/2009, as amended by Commission Regulation (EU) 2023/1545.

trans-Anethole is itself an EU declarable fragrance allergen listed in Annex III of the Cosmetics Regulation. Products containing this substance must declare Anethole on the ingredient label when its concentration in the finished cosmetic product exceeds:

- 0.001% (10 ppm) in leave-on products.
- 0.01% (100 ppm) in rinse-off products.

EU Fragrance Allergen	CAS Number	Typical Content

Anethole (trans-Anethole) 4180-23-8 $\geq 98.0\%$

DECLARATION

Anethole Natural is a naturally derived aroma chemical consisting predominantly of trans-Anethole obtained by isolation from natural essential oils such as Star Anise, Anise or Fennel.

Because Anethole is itself an individually listed fragrance allergen under Annex III of Regulation (EC) No. 1223/2009 (as amended), this raw material shall be regarded as containing Anethole at the concentration present in the product (typically $\geq 98\%$).

No additional EU declarable fragrance allergens have been verified from the available compositional information for this isolated natural substance.

The manufacturer of the finished cosmetic product remains responsible for evaluating the complete fragrance composition and ensuring compliance with the applicable EU allergen labelling requirements.

REGULATORY NOTE

This certificate is issued to support compliance with:

- Regulation (EC) No. 1223/2009 on Cosmetic Products.
- Commission Regulation (EU) 2023/1545 regarding fragrance allergen labelling.

This declaration applies solely to the raw material identified above and is based on currently available regulatory information.
