IFRA 51 Ingredients

Product Name: TIMBERSILK TOCO
Sales Number: 00202192

November 28, 2024

BLH S.A.S
France

To whom it may concern,

With reference to your inquiry we would like to inform you that the IFF product indicated above does not contain any ingredient prohibited by the International Fragrance Association (IFRA) Code of Practice and Standards through the 51st Amendment. Any ingredient present which has an IFRA specification standard is used only if its quality meets the criteria established.

The IFF product indicated above contains the following materials* for which a restriction standard has been issued by IFRA through the 51st Amendments:

Ingredient Name	CAS Number	Concentration (%)*
Otne (1-(1,2,3,4,5,6,7,8 octahydro-2,3,8,8-tetramethyl-2-naphthalenyl) ethanone)	54464-57-2, 54464-59-4, 68155-66-8, 68155-67-9	99.8

*Concentrations shown include intentionally added material, natural components and synthetic impurities and a cut off of 10 ppm applies. (Cut off does not apply to Benzene)

Should you have any further questions or if we can be of additional assistance to you, please do not hesitate to contact us.

Sincerely,

Global Regulatory Affairs

12	Products not intended for direct skin contact, minimal or insignificant transfer to skin e.g. candles, incenses, enclosed air fresheners, scent beads, fabric softener sheets, toilet gel	100.0

* The IFRA (International Fragrance Association at ifrafragrance.org) standards are industry guidelines for the safe use of fragrance ingredients. They are based on a thorough evaluation by independent experts of toxicological and environmental data available for an ingredient and its aggregated exposure from cosmetic, household and other fragranced consumer products. For many proprietary IFF fragrance ingredients that do not have an IFRA standard, IFF experts have derived internal safe use standards based on an evaluation of toxicological information for the ingredient following the guidelines established by the Research Institute for Fragrance Materials (RIFM) and the International Fragrance Association (IFRA). These internal standards have also been taken into account in deriving the QRA2 maximum use levels provided in this document. The safety of the consumer products containing our fragrances and their safety in reliance on the presentation, labeling, packaging or instructions for use of the final product can be fully assured only by your own appropriate evaluation of your product. All the information provided is based on data collected for each ingredient used in the formula. In the situation where ingredients of the fragrance compound have been evaluated and determined not to be dermal sensitizers, pragmatic maximum levels are provided as general guidance. The information contained herein is, to the best of our knowledge, true and accurate at the time it is given. The maximum levels reported are only accurate if this fragrance is the only fragrance contributor in your product. **Customer guidelines are excluded from this document.**
