Amberwood F

PRODUCT INFORMATION

Parameter	Details
Product Name:	Amberwood F
Manufacturer:	Symrise AG
Manufacturer Code:	600113
Chemical Name:	(Ethoxymethoxy)cyclododecane
CAS Number:	58567-11-6
EC Number:	261-332-1
IFRA Amendment:	51st Amendment (2023)
Document Date:	19 November 2026

IFRA MAXIMUM USAGE LEVELS

Maximum concentrations in the finished product, as published in the official IFRA 51 standard for (Ethoxymethoxy)cyclododecane.

IFRA Category	Maximum Concentration (%)
Category 1	0.270
Category 2	0.080
Category 3	1.600
Category 4 – Fine Fragrance	1.500
Category 5A	0.380
Category 5B	0.380
Category 5C	0.380
Category 5D	0.130
Category 6	0.490
Category 7A	3.100

AROMOLOGY

Category 7B	3.100
Category 8	0.130
Category 9	2.900
Category 10A	11.000
Category 10B	11.000
Category 11A	0.130
Category 11B	0.130
Category 12	Not restricted under this standard

RESTRICTION BASIS

The IFRA 51st Amendment restricts (Ethoxymethoxy)cyclododecane on the basis of:

Dermal sensitisation
Systemic toxicity

The maximum concentrations are expressed as percentages of the finished consumer product.

IMPORTANT APPLICATION NOTES

The official IFRA standard provides numerical limits for Categories 1 and 6. However, a separate product-specific third-party certificate lists those categories as **Not approved** because additional requirements apply to products with potential oral exposure.

For AROMOLOGY's customer-facing documentation, Categories 1 and 6 should not be represented as approved uses without the necessary additional assessment.

All other category limits must be applied to the finished product, accounting for any other restricted substances present in the complete formulation.

REGULATORY DECLARATION

The category percentages in this statement are taken from the official IFRA 51st Amendment standard applicable to CAS 58567-11-6.

This document is a summary of the published IFRA restriction and is not a batch-specific manufacturer-issued Certificate of Conformity.
