Restricted Substances

The available IFRA 51 certificate states:

No substances restricted by the current IFRA Standards are contained in the material.

Important Interpretation

“Not Limited” does not mean that 100% neat Ambrocenide is recommended for consumer application.

It means no concentration restriction is imposed through an ingredient-specific IFRA Standard for that category in the cited IFRA-51 assessment.

Use remains subject to:

- Complete product safety assessment
- Toxicological evaluation
- Good Manufacturing Practice
- Applicable cosmetic legislation
- Intended consumer exposure
- Appropriate fragrance dosage

Category 1

Includes products such as:

- Lip products
- Lipsticks
- Lip balms
- Certain children's toys

Status: NOT APPROVED

Category 4 – Fine Fragrance

Includes:

- Extrait de Parfum
- Parfum
- Eau de Parfum

A R O M A T I C S

- Eau de Toilette
- Cologne
- Solid perfume

IFRA 51 Status: NOT LIMITED

However, Symrise's recommended perfumery dosage remains:

Traces up to 2%

because Ambrocenide is exceptionally powerful.

Category 6

Includes oral-care products such as:

- Toothpaste
- Mouthwash
- Breath sprays
- Tooth powders

Status: NOT APPROVED

IFRA Declaration

Based on the available IFRA 51 documentation:

- Ambrocenide® Crystals complies with IFRA Standards up to and including the **51st** Amendment.
- Categories 1 and 6 are not approved.
- Categories 2, 3, 4, 5A–5D, 7A–7B, 8, 9, 10A–10B, 11A–11B and 12 are not limited by the cited IFRA assessment.
- No IFRA-restricted substances are reported in that certificate.
- Final product safety remains the responsibility of the finished-product manufacturer.
