Ambrostar®

Product Identification

Item	Details
Product	Ambrostar®
Manufacturer	Symrise AG
Product No.	903865
CAS	1357064-95-9
Molecular Formula	C ₂₀ H ₃₄ O ₂
Molecular Weight	306.5 g/mol
Chemical Class	Acetal
Physical State	Liquid

Product Status

Ambrostar® is a discrete synthetic fragrance material and not a natural complex substance. Symrise identifies it for perfumery use under Product No. 903865 and CAS 1357064-95-9.

A current fragrance-material supplier lists IFRA 51 Category 4 as “Not restricted” for Ambrostar®.

I did not, however, locate an accessible original Symrise-issued IFRA 51 document giving a complete Category 1–12 numerical table. Therefore, I would not fabricate a full category table.

IFRA 51 Assessment

IFRA Category	Declaration
Category 1	Current manufacturer/regulatory assessment required
Category 2	No product-specific numerical restriction verified
Category 3	No product-specific numerical restriction verified

AROMOLGY

IFRA Category	Declaration
Category 4	Reported as Not Restricted
Category 5A	No product-specific numerical restriction verified
Category 5B	No product-specific numerical restriction verified
Category 5C	No product-specific numerical restriction verified
Category 5D	No product-specific numerical restriction verified
Category 6	Current manufacturer/regulatory assessment required
Category 7A	No product-specific numerical restriction verified
Category 7B	No product-specific numerical restriction verified
Category 8	No product-specific numerical restriction verified
Category 9	No product-specific numerical restriction verified
Category 10A	No product-specific numerical restriction verified
Category 10B	No product-specific numerical restriction verified
Category 11A	No product-specific numerical restriction verified
Category 11B	No product-specific numerical restriction verified
Category 12	No product-specific numerical restriction verified

IFRA itself explains that Standards impose restrictions only where safety assessment identifies a need, and that raw-material suppliers should communicate conformity with applicable Standards rather than imply that IFRA itself certifies individual raw materials.

Fine Fragrance – Category 4

For fine fragrance applications such as:

- Parfum
- Extrait de Parfum
- Eau de Parfum
- Eau de Toilette
- Cologne

the available Ambrostar-specific regulatory listing reports:

IFRA 51 CATEGORY 4 – NOT RESTRICTED

This is separate from Symrise's recommended perfumery dosage of traces–2%, which reflects the extreme olfactory power of the molecule.

Declaration

Based on the information currently available:

- Ambrostar® is Symrise Product 903865.
- CAS: 1357064-95-9.
- It is a synthetic acetal fragrance molecule.
- Category 4 is reported as not restricted under IFRA 51.

A R O M O L O G Y

- Symrise recommends an olfactory dosage from traces to approximately 2%.
- The recommended 2% dosage is not an IFRA maximum.
- The complete fragrance formulation must still comply with all other applicable IFRA Standards.
- An original current Symrise regulatory statement should take precedence for a formal Category 1–12 customer certificate.
