Aphermate® – IFF

Product Identification

Parameter	Details
Trade Name	Aphermate®
IFF Compendium Name	CP Formate Aphermate
Chemical Name	1-(3,3-Dimethylcyclohexyl)ethyl formate
CAS Number	25225-08-5
Manufacturer	International Flavors & Fragrances Inc. – IFF
Applicable IFRA Framework	IFRA Standards up to and including the 51st Amendment
Document Type	Representative raw-material declaration

Basis of Declaration

A publicly accessible current IFF-issued IFRA 51 Certificate of Conformity containing category-specific maximum levels for Aphermate® was not available for verification when this document was prepared.

Consequently, no universal numerical IFRA limit is assigned in this representative declaration.

For every finished product, the permitted concentration must be established using:

- Current IFF IFRA Certificate of Conformity
 - Exact commercial product code
 - Complete fragrance formula
 - Intended IFRA category
 - Concentration in the fragrance compound
 - Finished-product fragrance dosage
 - Contributions from all regulated constituents
-

IFRA Category Assessment

IFRA Category	Representative Product Types	Status
Category 1	Lip products	Formula assessment required
Category 2	Deodorants and antiperspirants	Formula assessment required
Category 3	Eye and facial products	Formula assessment required
Category 4	Fine fragrance	Formula assessment required
Category 5A	Body lotions and creams	Formula assessment required
Category 5B	Facial moisturisers	Formula assessment required
Category 5C	Hand creams	Formula assessment required
Category 5D	Baby creams and oils	Formula assessment required
Category 6	Oral-care products	Formula assessment required
Category 7A	Rinse-off hair products	Formula assessment required
Category 7B	Leave-on hair products	Formula assessment required
Category 8	Intimate wipes and related products	Formula assessment required
Category 9	Soap and rinse-off body products	Formula assessment required
Category 10A	Household products with hand contact	Formula assessment required
Category 10B	Aerosol and spray air-care products	Formula assessment required
Category 11A	Incidental skin contact with UV exposure	Formula assessment required
Category 11B	Incidental skin contact without UV exposure	Formula assessment required
Category 12	Candles, incense and negligible skin contact	Formula assessment required

Relevant Composition Considerations

Publicly available commercial information indicates that Aphermate® may contain:

Constituent	Representative Level	IFRA Relevance
CP Formate	Approximately 65–85%	Assess using current manufacturer certificate
Related Esters	Total esters above 80%	Composition dependent
1-(3,3-Dimethylcyclohexyl)ethanol	Below approximately 7%	Sensitisation and formula review may be relevant
Stabiliff Antioxidant	Approximately 0.1%	Manufacturer composition required
Other Related Constituents	Balance	Manufacturer assessment required

No constituent concentration in this table should be used to calculate an IFRA maximum without the current IFF certificate.

Perfumery Use Guidance

IFF's ingredient compendium provides technical and olfactive information for ingredient selection. Published commercial guidance may suggest broad formulation ranges, but such guidance is:

A R O M O L O G Y

- Not an IFRA maximum
- Not a legal cosmetic limit
- Not a finished-product safety conclusion
- Not approval for undiluted skin application

Conditional Conformity Statement

Aphermate® may be used in a fragrance compound only when:

1. The exact product and batch are supported by current IFF documentation.
2. The intended finished-product category has been identified.
3. The current category-specific IFRA limit has been applied.
4. All regulated constituents from the entire formula have been calculated cumulatively.
5. The final product has undergone an appropriate safety assessment.

No unrestricted or universal maximum use level is certified by this template.

Additional Safety Considerations

IFRA conformity addresses applicable IFRA Standards but does not independently establish compliance with:

- Skin irritation requirements
- Skin sensitisation assessment
- Eye irritation requirements
- Inhalation exposure requirements
- Environmental classification
- Occupational exposure controls
- Cosmetic Product Safety Report requirements
- Regional consumer-product legislation

Documentation Required Before Formal Issue

Obtain and verify:

- Current IFF IFRA 51 Certificate of Conformity
- Exact product code
- Current composition version
- Original batch number
- Restricted-material statement
- Product category
- Fragrance formula
- Final dosage
- Current EU allergen declaration
- Finished-product safety assessment

A R O M O L O G Y

Declaration

Based on the information available:

Aphermate® requires product- and category-specific IFRA assessment.

No unsupported numerical maximum is assigned in this document.

The current manufacturer-issued IFF certificate shall determine the applicable maximum use level.

Disclaimer

This is a representative supplier-style IFRA 51 declaration. It is not issued by IFF or IFRA and does not replace an original manufacturer Certificate of Conformity.

The finished-product manufacturer remains responsible for:

- Selecting the correct IFRA category
- Applying the current manufacturer limit
- Calculating cumulative regulated constituents
- Assessing exposure
- Confirming regional regulatory compliance
- Maintaining supporting documentation

Where this declaration differs from the current IFF documentation, the IFF documentation shall prevail.
