Benzoin Oliffac 63 – IFF

Product Identification

Parameter	Details
Product Name	Benzoin Oliffac 63 – IFF
Representative Manufacturer Reference	Benzoin Oliffac 63 DEPR 0612
Product Type	Proprietary fragrance mixture
CAS Number	Mixture
Manufacturer	International Flavors & Fragrances Inc. – IFF
Applicable Framework	IFRA Standards up to and including the 51st Amendment

Basis of Declaration

An available third-party IFRA certificate for Benzoin Oliffac 63 reports conformity with the IFRA Standards up to and including the 51st Amendment, subject to the category conditions below.

This certificate does not replace:

- The current IFF Certificate of Conformity
- A complete toxicological assessment
- Finished-product safety substantiation
- Regional legal compliance
- Evaluation of non-IFRA endpoints

IFRA 51 Maximum-Use Table

IFRA Category	Representative Product Types	Maximum Level
Category 1	Lip products	Not approved
Category 2	Deodorants and antiperspirants	Not limited
Category 3	Eye and facial products	Not limited
Category 4	Fine fragrance	Not limited

AROMOL OGY

Category 5A	Body lotions and creams	Not limited
Category 5B	Facial moisturisers	Not limited
Category 5C	Hand creams	Not limited
Category 5D	Baby creams and oils	Not limited
Category 6	Oral-care products	Not approved
Category 7A	Rinse-off hair products	Not limited
Category 7B	Leave-on hair products	Not limited
Category 8	Intimate wipes and related products	Not limited
Category 9	Soap and rinse-off body products	Not limited
Category 10A	Household products with hand contact	Not limited
Category 10B	Aerosol and spray air-care products	Not limited
Category 11A	Incidental skin contact with UV exposure	Not limited
Category 11B	Incidental skin contact without UV exposure	Not limited
Category 12	Candles, incense and negligible skin contact	Not limited

Meaning of “Not Limited”

“Not limited” means that the available certificate did not identify an IFRA Standard-derived numerical restriction for the assessed composition and category.

It does not mean:

- Unlimited toxicological safety
- Unrestricted commercial use
- Suitability at 100% in every finished product
- Exemption from local cosmetic law
- Exemption from exposure assessment
- Exemption from stability or compatibility testing

IFRA-Regulated Constituents

Constituent	CAS No.	Concentration in Fragrance Mixture
Benzyl Benzoate	120-51-4	0.0330%

No other restricted material is listed in the available third-party IFRA 51 certificate.

The current IFF certificate must be consulted because formulation revisions may change the composition.

Cumulative Formula Assessment

The final assessment must include contributions from:

- Benzoin Oliffac 63
- Natural benzoin resinoids
- Benzyl benzoate

A R O M A T I C S

- Balsams and resins
- Essential oils
- Absolutes and extracts
- Other fragrance bases
- Aroma chemicals
- Solvents and carriers
- Functional ingredients

The same restricted constituent must not be assessed separately when it occurs from multiple sources.

Conditional Conformity Declaration

Based on the available IFRA 51 certificate:

Benzoin Oliffac 63 is not approved for IFRA Categories 1 and 6.

For Categories 2, 3, 4, 5A–5D, 7A–7B, 8, 9, 10A–10B, 11A–11B and 12, no IFRA Standard-derived numerical restriction was listed for the assessed composition.

Use remains subject to:

- Current IFF documentation
- Complete formula assessment
- Finished-product safety evaluation
- Applicable cosmetic and consumer-product law
- Good manufacturing practice

Information Required Before Commercial Issue

Confirm:

- Exact IFF product code
- DEPR or other formulation version
- Current IFF IFRA certificate
- Current batch number
- Current restricted-material concentrations
- Intended finished-product type
- Correct IFRA category
- Concentration in fragrance compound
- Finished-product fragrance dosage
- Cumulative contribution from other ingredients

Disclaimer

A R O M O L O G Y

This document is a representative supplier-issued IFRA 51 template based partly on publicly available third-party documentation.

It is not:

- Issued by IFRA
- Issued by IFF
- A substitute for the current IFF certificate
- A comprehensive safety assessment
- A finished-product approval

IFRA conformity certificates are normally issued for a defined fragrance mixture and formulation version. Any reformulation, alternative solvent system or different Benzoin Oliffac 63 grade may require reassessment.

The finished-product manufacturer remains responsible for category selection, dosage calculations, cumulative restricted-material assessment, product safety and legal compliance.
