IMPORTANT – HISTORICAL 4% RECOMMENDATION

AROMOLGY

Older safety information reports a historical recommendation for Civet Absolute of:

Up to 4.0% in the fragrance concentrate.

I would not put 4% into your IFRA Category 4 field because this historical recommendation is not the same thing as an IFRA 51 Category 4 maximum concentration.

Use:

IFRA 51 Category 4: No specific restriction identified

rather than:

Maximum: 4%

FORMAL DECLARATION

Based on the IFRA 51 information reviewed:

CIVET ABSOLUTE NATURAL – GOLD GRADE

ROBERTET

CODE: 99050019

CAS NO.: 68916-26-7

is not identified as subject to a material-specific restriction under the IFRA 51st Amendment.

This declaration relates to the raw material itself. Final IFRA compliance of a fragrance preparation must consider the complete formulation, restricted constituents, other fragrance ingredients and intended finished-product category.

DISCLAIMER

This is a supplier-style IFRA 51 Regulatory Declaration based on available manufacturer and regulatory information. It is not an original Robertet-issued IFRA Certificate of Conformity. The latest Robertet regulatory documentation should prevail where an original manufacturer certificate is required.
