Typical Perfumery Guidance

Cyclohexyl Ethyl Acetate is commonly used to impart:

- Fresh rose nuances
- Raspberry and red-fruit effects
- Floral body
- Diffusion and persistence

The appropriate use level should be determined by the perfumer according to the intended fragrance profile and finished-product safety assessment.

Declaration

Cyclohexyl Ethyl Acetate – IFF complies with the IFRA Standards through the 51st Amendment and is not currently subject to a material-specific IFRA concentration restriction. Compliance of the finished fragrance remains dependent upon the cumulative contribution of all restricted ingredients present in the complete formula.
