## IFRA COMPLIANCE STATEMENT

IFRA Standards – 51<sup>st</sup> Amendment

**Product Name:** Green Hojari Frankincense Essential Oil

**Botanical Name:** *Boswellia sacra*

**INCI Name:** Boswellia Sacra Oil

**Country of Origin:** Oman

**Extraction Method:** Steam Distillation

**Plant Part:** Resin

**CAS Number:** 8016-36-2 / 89957-98-2

**EC Number:** 289-620-2

**IFRA Amendment:** 51<sup>st</sup> Amendment

**IFRA Publication Date:** June/July 2023

**Document Type:** IFRA Certificate of Conformity

### Scope of Certificate

This certificate provides information concerning the conformity of Green Hojari Frankincense Essential Oil with the Standards of the International Fragrance Association (IFRA), up to and including the 51<sup>st</sup> Amendment.

The assessment is based on substances subject to IFRA Standards and on the corresponding toxicity endpoints described in the applicable Standards.

This certificate does not constitute a comprehensive safety assessment of every constituent of the material or of the finished product.

### Maximum Permitted Concentrations

The material may be used in the following IFRA categories at or below the stated maximum concentration in the finished consumer product:

| IFRA Category | Product Application                                                                                  | Maximum Use Level |
|---------------|------------------------------------------------------------------------------------------------------|-------------------|
| Category 1    | Lip products and children's toys                                                                     | 0.87%             |
| Category 2    | Deodorants, antiperspirants and body sprays intended for the axillae                                 | 1.20%             |
| Category 3    | Eye products, facial cosmetics, makeup removers, facial wipes and facial masks                       | 5.60%             |
| Category 4    | Fine fragrances, perfumes, eaux de toilette, colognes, solid perfumes and aftershaves                | 8.00%             |
| Category 5A   | Body creams, body oils, lotions, foot-care products, skin-applied insect repellents and body powders | 2.18%             |
| Category 5B   | Facial toners, facial moisturisers, facial creams and beard-care products                            | 1.18%             |

## AROM OLOGY

| IFRA Category | Product Application                                                                                                                                              | Maximum Use Level |
|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| Category 5C   | Hand creams, nail-care products, cuticle creams, nail-polish removers and hand sanitisers                                                                        | 1.38%             |
| Category 5D   | Baby creams, baby lotions, baby oils, baby powders and baby talc                                                                                                 | 0.84%             |
| Category 6    | Toothpaste, mouthwash, breath sprays, tooth powders and oral-care tablets                                                                                        | 1.40%             |
| Category 7A   | Rinse-off hair treatments, relaxers and rinse-off hair dyes                                                                                                      | 1.56%             |
| Category 7B   | Hair sprays, styling products, leave-on conditioners, dry shampoos, hair perfumes and leave-on hair treatments                                                   | 1.56%             |
| Category 8    | Intimate wipes, intimate sprays, tampons, baby wipes and wet toilet paper                                                                                        | 0.42%             |
| Category 9    | Soaps, shampoos, rinse-off conditioners, body washes, shower gels, bath products, shaving products and depilatories                                              | 2.88%             |
| Category 10A  | Hand-wash laundry products, dishwashing products, hard-surface cleaners, fabric treatments, reed diffusers and similar household products involving hand contact | 2.88%             |
| Category 10B  | Air-freshener sprays, animal sprays and aerosol or spray insecticides                                                                                            | 3.20%             |
| Category 11A  | Feminine hygiene pads, baby diapers, incontinence products and dry toilet paper without expected UV exposure                                                     | 0.94%             |
| Category 11B  | Scented textiles, facial tissues, pillow sprays, paper towels, protective face masks and similar products with possible UV exposure                              | 0.94%             |
| Category 12   | Candles, incense, automated air fresheners, plug-ins, fragrancing sachets, cat litter, dryer sheets and products with insignificant skin contact                 | 48.50%            |

### Phototoxicity Considerations

| IFRA Category | Phototoxicity Consideration |
|---------------|-----------------------------|
| Category 1    | Applicable – leave-on       |
| Category 2    | Applicable – leave-on       |
| Category 3    | Applicable – leave-on       |
| Category 4    | Applicable – leave-on       |
| Category 5A   | Applicable – leave-on       |
| Category 5B   | Applicable – leave-on       |
| Category 5C   | Applicable – leave-on       |
| Category 5D   | Applicable – leave-on       |
| Category 6    | Applicable – rinse-off      |
| Category 7A   | Applicable – rinse-off      |
| Category 7B   | Applicable – leave-on       |

## AROM OLOGY

| IFRA Category | Phototoxicity Consideration                      |
|---------------|--------------------------------------------------|
| Category 8    | Applicable – leave-on                            |
| Category 9    | Applicable – rinse-off                           |
| Category 10A  | Applicable – rinse-off                           |
| Category 10B  | Applicable – leave-on                            |
| Category 11A  | Not applicable – leave-on without UV exposure    |
| Category 11B  | Applicable – leave-on with potential UV exposure |
| Category 12   | Not applicable – non-skin-contact products       |

---

### IFRA Compliance Declaration

We certify that, based on the available technical information, the above-mentioned material conforms to the Standards of the International Fragrance Association up to and including the **51st Amendment**, provided that it is used at or below the maximum concentration specified for the applicable IFRA category.

The stated maximum concentrations apply only to this individual material. They may not remain valid when the material is combined with other ingredients that contain the same IFRA-restricted constituents.

When determining the permitted concentration in a finished formulation, the formulator must consider the combined contribution of all restricted substances from every ingredient in the formula.

For applications outside the listed categories or for use above the stated maximum concentration, a new safety evaluation is required.

### Important Regulatory Information

The IFRA Standards are based on safety assessments carried out by the Research Institute for Fragrance Materials and are implemented through the IFRA Code of Practice.

This certificate:

- Applies only to the IFRA-restricted substances considered in the supporting assessment;
- Does not replace a comprehensive cosmetic or consumer-product safety assessment;
- Does not certify compliance with every applicable national or international regulation;
- Does not replace allergen labelling, SDS or toxicological requirements;
- Does not assess the microbiological quality, purity or authenticity of the material; and
- Does not automatically confirm that the material is safe for undiluted use.

The manufacturer of the finished product remains responsible for:

- Identifying the correct IFRA category;
- Observing the stated maximum concentration;
- Assessing the complete finished formulation;
- Calculating the combined contribution of restricted constituents;

## A R O M O L O G Y

- Completing any required cosmetic safety assessment;
- Confirming applicable allergen-labelling requirements; and
- Ensuring compliance with all relevant laws and regulations.

### Natural Complex Substance Statement

Green Hojari Frankincense Essential Oil is a natural complex substance. Its chemical composition may vary according to geographical origin, harvesting season, resin grade, distillation conditions and individual production batch.

Consequently, significant compositional variation may require a new IFRA calculation. Where current batch-specific GC-MS or compositional data is available, that information must take precedence over general or reference values.

---

### Certification

**IFRA Amendment:** 51st Amendment

**Issue Date:** 18 August 2026

**Validity:** Subject to changes in product composition, applicable legislation or IFRA Standards
