Kephalis®

Product Identification

Item	Details
Product Name	Kephalis®
Manufacturer	Givaudan SA
Chemical Name	4-(1-Ethoxyvinyl)-3,3,5,5-tetramethylcyclohexan-1-one (main component)
CAS Number	36306-87-3
Molecular Formula	C ₁₄ H ₂₄ O ₂
Molecular Weight	224.4 g/mol
Product Type	Aroma Chemical
Physical Form	Pale Yellow Liquid
Odour Profile	Woody, Ambery, Tobacco, Rich

Kephalis® is a long-lasting woody-amber aroma chemical used in heart and base notes. It blends particularly well with floral, woody, tobacco and masculine fragrance accords and is typically used at 1–8% in fragrance compounds.

IFRA Compliance Statement

Based on the current IFRA Standards (51st Amendment), Kephalis® (CAS 36306-87-3) is not subject to an ingredient-specific IFRA restriction. Public technical references from Givaudan and fragrance suppliers indicate that there are no individual IFRA concentration limits applicable to the neat raw material.

Important: Some reseller-issued IFRA certificates provide maximum use levels for their own fragrance compounds containing Kephalis®. These limits relate to those finished fragrance formulations and do not constitute an IFRA restriction on Kephalis® itself.

Declaration

Based on the available IFRA documentation:

- Kephalis® complies with the IFRA Standards (51st Amendment).
 - No ingredient-specific IFRA concentration restriction applies to the neat material.
 - The finished fragrance must nevertheless comply with all applicable IFRA Standards after considering every ingredient in the formulation.
 - Good Manufacturing Practice (GMP) should be followed in all applications.
