PRODUCT INFORMATION

Item	Details
Product Name	Labdanum Resinoid on Gurjun
Product Type	Proprietary Natural Co-distilled Blend
CAS Number	Mixture 8016-26-0/ 8000-75-3
Principal Components	Labdanum Resinoid / Gurjun Balsam
Applicable Standard	IFRA Standards – 51 st Amendment

IFRA STATUS

This product is a proprietary Natural Complex Substance (NCS) blend produced by co-distillation.

As the finished material is a proprietary mixture, no official IFRA 51 product-specific concentration limits have been identified for this co-distilled blend. IFRA compliance shall therefore be established by evaluating:

- The complete finished fragrance formulation.
- Any IFRA-restricted constituents naturally present in the raw materials.
- The intended IFRA product category.
- The original manufacturer's current IFRA conformity documentation.

Published IFRA documentation is available for individual Labdanum resinoid products and formulations but is not directly applicable to proprietary co-distilled blends.

NATURALLY OCCURRING IFRA-RELEVANT CONSTITUENTS

Depending on botanical origin and production batch, the blend may naturally contain trace quantities of substances that require consideration during finished fragrance safety assessment.

AROMOLOGY

The concentrations are batch dependent and cannot be assigned without manufacturer-specific analytical data.

CERTIFICATION

This material may be incorporated into fragrance formulations provided that:

- The finished fragrance complies with all applicable IFRA Standards.
- Naturally occurring restricted constituents are considered in the complete formulation.
- The appropriate IFRA Category is evaluated.
- The original producer's IFRA Certificate takes precedence over this representative declaration.

CONCLUSION

No product-specific IFRA 51 maximum use concentration has been established for this proprietary co-distilled material.

Finished fragrance compliance remains the responsibility of the fragrance manufacturer.
