LACTOJASMONE

PRODUCT IDENTIFICATION

Parameter	Details
Product	Lactojasmone
Manufacturer	Symrise
Product No.	660590
CAS No.	7011-83-8
Chemical Name	5-Hexyldihydro-5-methylfuran-2(3H)-one
Framework	IFRA Standards through 51st Amendment

IFRA 51 STATUS

I did not locate an official IFRA Standard specifically restricting CAS 7011-83-8 in the public IFRA search. Therefore, no material-specific Category 1–12 numerical maximum can be responsibly attributed to Symrise from an official IFRA Standard.

For supplier documentation, the appropriate wording is:

NO MATERIAL-SPECIFIC IFRA 51 RESTRICTION IDENTIFIED FOR LACTOJASMONE ITSELF.

This is not equivalent to recommending use at 100%.

SYMRISE RECOMMENDED USE

0.05–3% in the fragrance composition.
This is olfactive guidance, not an IFRA limit.

IMPORTANT INTERPRETATION

“No specific restriction identified” does not mean the complete fragrance is automatically IFRA compliant. All restricted ingredients and restricted constituents from all raw materials must still be assessed for the intended finished-product category.

FORMAL DECLARATION

Based on the publicly available information reviewed:

LACTOJASMONE – SYMRISE, PRODUCT NO. 660590, CAS 7011-83-8

has no material-specific IFRA 51 Standard identified. The complete fragrance formulation remains subject to all applicable IFRA Standards.

Disclaimer: This is a supplier-style IFRA regulatory declaration, not an original Symrise or IFRA-issued Certificate of Conformity. Current Symrise regulatory documentation shall prevail.
