PRODUCT INFORMATION

Item	Details
Product Name	Lavender CO ₂ Organic Extract
Botanical Name	<i>Lavandula angustifolia</i> Mill.
CAS Number	8000-28-0
Product Type	Natural Complex Substance (CO ₂ Extract)
Applicable Standard	IFRA Standards – 51st Amendment

IFRA STATUS

Lavender CO₂ Organic Extract is classified as a Natural Complex Substance (NCS).

At the time of preparation of this certificate, no individual IFRA Standard assigns product-specific maximum use concentrations for Lavender CO₂ Organic Extract. Compliance with the IFRA Standards shall therefore be established by evaluating:

- The complete finished fragrance formulation.
- Naturally occurring IFRA-relevant constituents.
- The intended IFRA product category.
- The original manufacturer's current IFRA Conformity Certificate.

The extract is produced by supercritical CO₂ extraction and contains a broader spectrum of naturally occurring constituents than steam-distilled lavender oil.

NATURALLY OCCURRING IFRA-RELEVANT CONSTITUENTS

The extract may naturally contain:

- Linalool

A R O M O L O G Y

- Linalyl Acetate
- Coumarin
- Geraniol
- Limonene
- Terpinen-4-ol

The concentration of these constituents is naturally variable and batch dependent.

CERTIFICATION

This material may be incorporated into fragrance formulations provided that:

- The finished fragrance complies with all applicable IFRA Standards.
- Naturally occurring restricted constituents are considered during safety assessment.
- The appropriate IFRA Category is evaluated.
- The original producer's IFRA documentation takes precedence over this representative declaration.

CONCLUSION

No product-specific IFRA 51 maximum use concentration has been established for Lavender CO₂ Organic Extract.

Compliance shall be determined from the complete finished fragrance formulation and its naturally occurring constituents.
