Linalool

Product Identification

Item	Details
Product Name	Linalool
Manufacturer	Givaudan SA
CAS Number	78-70-6
Product Type	Aroma Chemical
Physical Form	Liquid
Odour Profile	Floral, Lavender, Citrus

IFRA Compliance Statement

Linalool is covered by the IFRA Standard for Linalool. The current restriction is not directed at neat Linalool itself, but at limiting hydroperoxides formed through oxidation, which are responsible for skin sensitization. Compliance therefore depends on maintaining low peroxide levels through proper manufacture, storage and handling.

Unlike ingredients with fixed concentration limits, the IFRA Standard for Linalool is a Specification (S) rather than a category-based restriction. The material must comply with the peroxide specification before use in fragrance compounds.

IFRA Requirements

- Applicable IFRA Standard: **Linalool**
- Restriction Type: **Specification (S)**
- Basis of Restriction: **Hydroperoxides / Dermal Sensitization**
- Applicable CAS Numbers:
 - 78-70-6

A R O M O L O G Y

- 126-90-9
- 126-91-0

Manufacturers should:

- Store under nitrogen where practical.
- Minimise exposure to oxygen and light.
- Avoid prolonged storage after opening.
- Monitor peroxide values where required.
- Use antioxidants where appropriate and permitted.

Maximum Use Levels

No category-specific concentration limits apply to neat Linalool under IFRA 51.

Compliance is achieved by meeting the applicable peroxide specification and by ensuring the finished fragrance complies with all other IFRA Standards.

Declaration

Based on the available IFRA documentation:

- Linalool complies with the IFRA Standards (51st Amendment) when supplied and maintained in accordance with the IFRA specification.
- No numerical IFRA category limits apply specifically to neat Linalool.
- Finished fragrance compliance remains the responsibility of the fragrance manufacturer.
