REGULATORY AND SAFETY INFORMATION

The IFRA Standards concerning usage restrictions are based on safety assessments performed by the Research Institute for Fragrance Materials (RIFM) and implemented through the IFRA Scientific Committee.

Evaluation of individual fragrance ingredients is carried out in accordance with the relevant IFRA Code of Practice.

For absolutes and other raw materials, the supplied declaration states that restricted-substance percentages are determined using supplier information.

The finished-product manufacturer remains responsible for ensuring the safety of the final formulation and conducting additional testing where required.

DISCLAIMER

This certificate reflects the IFRA 51st Amendment information supplied for the identified raw material.

The stated maximum usage concentrations apply to the finished product and must not be interpreted as recommended formulation percentages.

Compliance with IFRA Standards does not replace the requirement for finished-product safety assessment, applicable cosmetic regulations, allergen labelling or other relevant legal obligations.
