### PRODUCT INFORMATION

---

| Item           | Details                                   |
|----------------|-------------------------------------------|
| Product Name   | Magnolia Flower Essential Oil             |
| INCI Name      | Magnolia Alba Flower Oil                  |
| Botanical Name | <i>Magnolia × alba</i>                    |
| CAS Number     | 8006-76-6                                 |
| EC Number      | 296-299-2                                 |
| Product Type   | Natural Complex Substance (Essential Oil) |
| IFRA Standard  | 51st Amendment                            |

---

### IFRA STATUS

Magnolia Flower Essential Oil is classified as a Natural Complex Substance (NCS).

Compliance with the IFRA Standards depends upon:

- Batch-specific composition.
  - Naturally occurring restricted constituents.
  - Concentration used in the finished fragrance.
  - Contributions from other ingredients.
  - Intended IFRA product category.
- 

### REPRESENTATIVE RESTRICTED CONSTITUENTS

| Restricted Constituent | Representative Maximum (%) |
|------------------------|----------------------------|
| Linalool               | ≤68.0                      |
| Methyl Eugenol         | ≤3.4                       |
| d-Limonene             | ≤10.0                      |
| Geraniol               | ≤0.4                       |

A R O M O L O G Y

Benzaldehyde

≤0.1

Published supplier IFRA documentation also identifies naturally occurring restricted constituents including methyl eugenol and linalool.

---

## IFRA COMPLIANCE

No single universal maximum use level can be assigned to Magnolia Flower Essential Oil because restrictions are driven by the concentration of naturally occurring restricted constituents—particularly methyl eugenol—and by the finished fragrance formulation.

Compliance with the IFRA 51st Amendment shall therefore be established using:

- Batch-specific analytical data.
- Current manufacturer IFRA certificate.
- Finished fragrance composition.
- Applicable IFRA product category.

---

## CERTIFICATION

Magnolia Flower Essential Oil may be incorporated into fragrance formulations provided that:

- The finished fragrance complies with the IFRA Standards (51st Amendment).
- Naturally occurring restricted constituents are calculated in the final formulation.
- Batch-specific manufacturer documentation is available.

The original manufacturer's IFRA Certificate shall always take precedence.

---

## CONCLUSION

No universal IFRA Category limits are declared in this representative certificate. Compliance must be demonstrated using batch-specific analytical data and the complete fragrance formulation.
