PRODUCT INFORMATION

Product Information	Details
Product Name	Marjoram Essential Oil
Botanical Name	<i>Origanum majorana</i> L.
INCI Name	Origanum Majorana Flower Oil
CAS Number	8015-01-8
EC Number	282-004-4
Country of Origin	Egypt
Extraction Method	Steam distillation
Product Type	Natural Complex Substance
Certificate Basis	IFRA Standards, 51st Amendment

Declaration

Based on the information available for this natural raw material, Marjoram Essential Oil – Egypt is not subject to a specific IFRA Standard that establishes a direct product-level maximum concentration.

Accordingly, no product-specific maximum use level has been assigned to the undiluted oil under the IFRA 51st Amendment.

However, this essential oil is a Natural Complex Substance and may naturally contain constituents that are individually subject to IFRA Standards. The permitted concentration in a finished fragrance compound must therefore be established from:

1. The actual batch composition or representative GC/MS analysis;
2. The total concentration of restricted constituents from all formula sources;
3. The intended IFRA finished-product category; and
4. Any applicable IFRA restriction, prohibition, specification or purity requirement.

IFRA Category Assessment

IFRA Category	Product-Level Status
Category 1	Not specifically restricted ¹
Category 2	Not specifically restricted ¹
Category 3	Not specifically restricted ¹
Category 4	Not specifically restricted ¹
Category 5A	Not specifically restricted ¹
Category 5B	Not specifically restricted ¹
Category 5C	Not specifically restricted ¹
Category 5D	Not specifically restricted ¹
Category 6	Not specifically restricted ¹
Category 7A	Not specifically restricted ¹
Category 7B	Not specifically restricted ¹
Category 8	Not specifically restricted ¹
Category 9	Not specifically restricted ¹
Category 10A	Not specifically restricted ¹
Category 10B	Not specifically restricted ¹
Category 11A	Not specifically restricted ¹
Category 11B	Not specifically restricted ¹
Category 12	Not specifically restricted ¹

¹“Not specifically restricted” does not mean unrestricted under every circumstance. The finished fragrance must comply with all IFRA Standards applicable to naturally occurring constituents and to other materials in the complete formulation.

Naturally Occurring Constituents Requiring Formula Review

Depending on the batch composition, constituents requiring consideration may include:

- Linalool
- Limonene
- Citral
- Geraniol
- Eugenol
- β -Caryophyllene
- p-Cymene
- Other naturally occurring terpenes and oxidation products

The presence of a constituent does not necessarily impose a numerical restriction in every application. Compliance must be calculated against the applicable IFRA Standard and the concentration contributed by all fragrance ingredients.

Important Conditions

- This certificate applies only to the product identified above.
- It does not constitute a safety assessment of a finished cosmetic or consumer product.
- It does not replace an IFRA conformity calculation for the complete fragrance formula.
- Oxidised essential oil should not be used where oxidation could increase sensitisation potential.
- The user is responsible for confirming compliance with the latest applicable legislation and the intended market's requirements.
- Where batch-specific analytical data differs materially from the representative profile, the formulation must be reassessed.

Certification

Aromology Trading LLC declares that, based on available compositional information and the IFRA Standards under the 51st Amendment, this material may be used in fragrance formulations provided that the finished fragrance complies with all standards applicable to its naturally occurring constituents.
