Mastic Essential Oil

Product Identification

Item	Details
Product Name	Mastic Essential Oil
Botanical Name	<i>Pistacia lentiscus</i> L.
CAS Number	90082-82-9 (Leaf Oil)
Product Type	Natural Essential Oil
Extraction Method	Steam Distillation

IFRA Status

Mastic Essential Oil is a Natural Complex Substance (NCS) whose composition varies naturally according to botanical source, geographical origin and distillation process.

The oil naturally contains constituents including α -pinene, limonene, linalool and other terpenes. Compliance with IFRA Standards depends on the concentration of any IFRA-restricted constituents in the specific batch and in the finished fragrance formulation.

No universal IFRA maximum use level exists for Mastic Essential Oil itself. Finished-product compliance must be established from:

- Batch-specific GC-MS analysis
- Concentration of naturally occurring restricted constituents
- Finished fragrance formulation
- Applicable IFRA product category

Representative IFRA Category Assessment

IFRA Finished Product Category	Maximum Use Level
Categories 1–12	Subject to batch-specific analytical evaluation and finished-formula safety assessment

Compliance Requirements

A R O M O L O G Y

Before issuing an IFRA Certificate for a finished fragrance:

1. Verify the current batch analytical profile.
2. Determine naturally occurring IFRA-restricted constituents.
3. Calculate cumulative concentrations from all fragrance ingredients.
4. Apply the relevant IFRA finished-product category.
5. Complete the finished-product safety assessment.

Declaration

Based on available information:

- Mastic Essential Oil may be used in professional fragrance formulations.
- No universal maximum use percentage can be assigned.
- Compliance depends on the composition of the individual batch and the finished formulation.
- This representative declaration does not replace the original manufacturer's IFRA Certificate.
