MINTONAT

PRODUCT IDENTIFICATION

Parameter	Details
Product Name	Mintonat
Manufacturer	Symrise
Product No.	142048
CAS Number	67859-96-5
EC Number	267-430-0
Chemical Class	Ester
Purity	≥98% GC – sum of isomers
IFRA Framework	51st Amendment

IFRA 51 STATUS

A review of available IFRA-related information for: 3,3,5-TRIMETHYLCYCLOHEXYL ACETATE
CAS 67859-96-5
did not identify a material-specific IFRA 51 restriction for Mintonat itself.
Current specialist perfumery references likewise report Mintonat as “not restricted” under IFRA
51, including for Category 4.

Accordingly:
NO MATERIAL-SPECIFIC IFRA 51 MAXIMUM USE LEVEL HAS BEEN IDENTIFIED FOR MINTONAT /
CAS 67859-96-5.

IFRA CATEGORY STATUS

IFRA Category	Mintonat Status
Category 1	No material-specific restriction identified
Category 2	No material-specific restriction identified
Category 3	No material-specific restriction identified

AROMOLGY

IFRA Category	Mintonat Status
Category 4	No material-specific restriction identified
Category 5A	No material-specific restriction identified
Category 5B	No material-specific restriction identified
Category 5C	No material-specific restriction identified
Category 5D	No material-specific restriction identified
Category 6	No material-specific restriction identified
Category 7A	No material-specific restriction identified
Category 7B	No material-specific restriction identified
Category 8	No material-specific restriction identified
Category 9	No material-specific restriction identified
Category 10A	No material-specific restriction identified
Category 10B	No material-specific restriction identified
Category 11A	No material-specific restriction identified
Category 11B	No material-specific restriction identified
Category 12	No material-specific restriction identified

IMPORTANT INTERPRETATION

“No material-specific restriction identified” does not mean that a finished fragrance may automatically use Mintonat at 100%.

The complete fragrance formulation must still comply with IFRA requirements applicable to:

- Other restricted fragrance ingredients
- Natural Complex Substances
- Restricted constituents
- Phototoxic substances
- Sensitising materials
- Finished-product category
- Total fragrance dosage
- Current applicable IFRA Standards

SYMRISE RECOMMENDED USE

Symrise recommends: 1–25% in the fragrance composition

This is an olfactive/perfumery recommendation and must not be confused with an IFRA maximum.

CATEGORY 4 – FINE FRAGRANCE

For products such as:

A R O M A T O L O G Y

- Extrait de Parfum
- Parfum
- Eau de Parfum
- Eau de Toilette
- Cologne

No Mintonat-specific Category 4 restriction was identified under the IFRA 51 references reviewed. A specialist supplier specifically reports Category 4 as “Not restricted.”

FORMAL DECLARATION

Based on the available regulatory information reviewed:

MINTONAT – SYMRISE
PRODUCT NO. 142048
CAS 67859-96-5

has:

NO MATERIAL-SPECIFIC IFRA 51 RESTRICTION IDENTIFIED.

The final fragrance formulation remains subject to all applicable IFRA Standards for its intended finished-product category.

DISCLAIMER

This is a supplier-style IFRA 51 regulatory declaration and not an original Symrise-issued IFRA Certificate of Conformity.

An original public Symrise IFRA certificate containing a numerical Category 1–12 table was not located. The latest manufacturer-issued regulatory documentation should take precedence where required for formal customer submission.
