OXANTHIA 50% TEC

PRODUCT IDENTIFICATION

Parameter	Details
Product Name	Oxanthia 50% TEC
Manufacturer	Symrise
Product No.	106171
Product Type	Mixture / Fragrance Preparation
CAS Number	Mixture
Active Ingredient	Oxanthia
Diluent	Triethyl Citrate (TEC)
Active Concentration	Approx. 50%
Regulatory Framework	IFRA Standards – 51 st Amendment

IFRA 51 STATUS

A publicly accessible original Symrise IFRA 51 Certificate of Conformity for Oxanthia 50% TEC, Product 106171, containing numerical maximum-use concentrations for all IFRA categories, was not located.

Therefore, no unsupported Category 1–12 percentages should be assigned to this product.

REGULATORY DECLARATION

Based on the available product and regulatory information reviewed:

NO VERIFIED PRODUCT-SPECIFIC NUMERICAL IFRA 51 MAXIMUM CONCENTRATION HAS BEEN IDENTIFIED FOR OXANTHIA 50% TEC FROM A PUBLIC ORIGINAL SYMRISSE CERTIFICATE.

AROMOLGY

This statement does not mean that the product is automatically permitted at 100% in all applications.

IFRA CATEGORY STATUS

IFRA Category	Status
Category 1	No verified product-specific numerical limit available
Category 2	No verified product-specific numerical limit available
Category 3	No verified product-specific numerical limit available
Category 4	No verified product-specific numerical limit available
Category 5A	No verified product-specific numerical limit available
Category 5B	No verified product-specific numerical limit available
Category 5C	No verified product-specific numerical limit available
Category 5D	No verified product-specific numerical limit available
Category 6	No verified product-specific numerical limit available
Category 7A	No verified product-specific numerical limit available
Category 7B	No verified product-specific numerical limit available
Category 8	No verified product-specific numerical limit available
Category 9	No verified product-specific numerical limit available
Category 10A	No verified product-specific numerical limit available
Category 10B	No verified product-specific numerical limit available
Category 11A	No verified product-specific numerical limit available
Category 11B	No verified product-specific numerical limit available
Category 12	No verified product-specific numerical limit available

IMPORTANT INTERPRETATION

The absence of a verified product-specific numerical restriction does not remove the requirement to assess the finished fragrance.

Compliance must consider:

- Oxanthia concentration
- Other restricted fragrance materials
- Natural Complex Substances
- Restricted constituents
- Skin sensitisation requirements
- Systemic exposure
- Finished-product category
- Total fragrance dosage
- Current applicable IFRA Standards

IFRA explains that its Standards are based on safety assessment and that companies must additionally comply with applicable national and regional regulations.

A R O M O L O G Y

CATEGORY 4 – FINE FRAGRANCE

For:

- Extrait de Parfum
- Parfum
- Eau de Parfum
- Eau de Toilette
- Cologne

No Oxanthia 50% TEC-specific Category 4 numerical maximum should be declared without the current Symrise regulatory certificate.

CARRIER – TRIETHYL CITRATE

Triethyl Citrate serves as the carrier/diluent in this preparation.

The IFRA assessment should therefore relate to the commercial Oxanthia 50% TEC mixture as supplied, rather than treating the product as neat Oxanthia.

FORMAL DECLARATION

We hereby declare that:

OXANTHIA 50% TEC – SYMRISE
PRODUCT NO. 106171

is a fragrance preparation consisting of Oxanthia diluted in Triethyl Citrate.

No verified manufacturer-issued numerical IFRA 51 Category 1–12 table was located publicly for the commercial product.

Final compliance shall therefore be determined against the applicable IFRA Standards and the latest manufacturer regulatory documentation for the intended finished-product category.

DISCLAIMER

This is a supplier-style IFRA 51 Regulatory Declaration and is not an original Symrise or IFRA-issued Certificate of Conformity.

The latest Symrise regulatory documentation shall prevail where an official customer or regulatory submission requires exact numerical category limits.
