PRENYL ACETATE

PRODUCT IDENTIFICATION

Parameter	Details
Product Name	Prenyl Acetate
Manufacturer	Symrise
Product No.	601331
CAS Number	1191-16-8
Chemical Name	3-Methylbut-2-en-1-yl acetate
Purity	Minimum 98% GC
Regulatory Framework	IFRA Standards – 51st Amendment

IFRA 51 STATUS

The official IFRA 51 documentation was reviewed for Prenyl Acetate / CAS 1191-16-8. IFRA provides its complete 51st Amendment Standards, index, guidance and overview through its official Standards documentation.

No specific IFRA 51 restriction standard for Prenyl Acetate / CAS 1191-16-8 was identified in the official material searched.

Therefore:

PRENYL ACETATE IS NOT IDENTIFIED AS SUBJECT TO A MATERIAL-SPECIFIC IFRA 51 MAXIMUM USE RESTRICTION.

IFRA CATEGORY STATUS

AROM OLOGY

IFRA Category	Status
Category 1	No specific IFRA 51 restriction identified
Category 2	No specific IFRA 51 restriction identified
Category 3	No specific IFRA 51 restriction identified
Category 4	No specific IFRA 51 restriction identified
Category 5A	No specific IFRA 51 restriction identified
Category 5B	No specific IFRA 51 restriction identified
Category 5C	No specific IFRA 51 restriction identified
Category 5D	No specific IFRA 51 restriction identified
Category 6	No specific IFRA 51 restriction identified
Category 7A	No specific IFRA 51 restriction identified
Category 7B	No specific IFRA 51 restriction identified
Category 8	No specific IFRA 51 restriction identified
Category 9	No specific IFRA 51 restriction identified
Category 10A	No specific IFRA 51 restriction identified
Category 10B	No specific IFRA 51 restriction identified
Category 11A	No specific IFRA 51 restriction identified
Category 11B	No specific IFRA 51 restriction identified
Category 12	No specific IFRA 51 restriction identified

IMPORTANT INTERPRETATION

“No specific restriction identified” does not mean that Prenyl Acetate should automatically be declared as 100% permitted in every finished consumer product.

The finished fragrance must still comply with all applicable IFRA Standards arising from:

- Other restricted ingredients
- Restricted constituents or impurities
- Natural Complex Substances
- Combined contributions
- Finished-product category
- Total fragrance concentration
- Applicable toxicological requirements

SYMRISE RECOMMENDED USE

Symrise recommends: 0.1–6%
for Prenyl Acetate in perfumery.

This is an olfactive/recommended formulation range and NOT an IFRA maximum concentration.

CATEGORY 4 – FINE FRAGRANCE

For fine fragrance applications such as Eau de Parfum, Eau de Toilette, Parfum and Cologne:

A R O M O L O G Y

IFRA 51 STATUS: NO PRENYL ACETATE-SPECIFIC NUMERICAL RESTRICTION IDENTIFIED
This is preferable to putting an unsupported numerical Category 4 value into your certificate.

FORMAL DECLARATION

Based on the IFRA 51 documentation reviewed, we declare that:

PRENYL ACETATE – SYMRISE
PRODUCT NO.: 601331
CAS NO.: 1191-16-8

is not identified as subject to a material-specific numerical restriction under the IFRA 51st Amendment.

The final fragrance formulation must nevertheless comply with all IFRA Standards applicable to its complete composition and intended finished-product category.

DISCLAIMER

This is a supplier-style regulatory declaration and is **not an original Symrise-issued IFRA Certificate of Conformity**. The latest manufacturer regulatory documentation should take precedence where an official certificate is required.
