Pyranol® – BASF

PRODUCT IDENTIFICATION

Parameter	Details
Product	Pyranol®
Manufacturer	BASF
CAS Number	63500-71-0
EC Number	405-040-6
Product Type	Synthetic Aroma Chemical
IFRA Amendment	51st Amendment

IFRA ASSESSMENT

Pyranol® is a synthetic aroma chemical used primarily to impart fresh muguet (lily-of-the-valley), floral and green notes in fine fragrances and functional fragrances.

A review of the IFRA Standards indicates no substance-specific IFRA Standard for Pyranol® (CAS 63500-71-0). Therefore, there is no individual IFRA concentration restriction assigned to this material under the IFRA 51st Amendment. Compliance is determined by the finished fragrance formulation and the cumulative contribution of any restricted constituents from other ingredients.

IFRA CATEGORY ASSESSMENT

IFRA Categories 1–12 Status

Categories 1–12 No specific IFRA restriction established for the raw material*

*Final compliance of the finished fragrance must consider all applicable IFRA Standards for every ingredient in the formulation.

A R O M O L O G Y

DECLARATION

1. Pyranol® is not currently subject to a specific IFRA Standard under the IFRA 51st Amendment.
2. This material may be used in fragrance formulations provided the finished product complies with all applicable IFRA Standards.
3. The cumulative contribution of all restricted ingredients in the formulation shall be assessed.
4. This declaration applies only to the identified raw material.
