Product Information

Parameter	Details
Product Name	Rose de Mai Absolute
Alternative Name	Rose Centifolia Absolute; May Rose Absolute
Botanical Name	<i>Rosa centifolia</i> L.
INCI Name	<i>Rosa Centifolia Flower Extract</i>
CAS Number	8007-01-0
Plant Part Used	Flowers
Extraction Method	Solvent extraction
Product Type	Natural complex substance
Applicable Standard	IFRA Standards – 51 st Amendment

The IFRA 51st Amendment was formally notified in July 2023. IFRA describes its Standards as a risk-management system for the safe use of fragrance ingredients.

Conformity Statement

Based on the available representative compositional information, Rose de Mai Absolute, CAS No. 8007-01-0, is not identified here as having a standalone category-specific maximum-use table under the IFRA 51st Amendment.

The material may nevertheless contain naturally occurring constituents that are subject to individual IFRA Standards or specifications.

Therefore, compliance must be established from:

- Batch-specific GC-MS or quantitative constituent data
- The concentration of the absolute in the fragrance compound
- The fragrance-compound dosage in the finished product
- The applicable IFRA finished-product category
- Contributions of the same restricted constituents from all other raw materials

AROM OLOGY

IFRA states that Certificates of Conformity are generally intended for fragrance mixtures rather than individual raw materials. Raw-material suppliers may instead communicate conformity and restricted-constituent information.

IFRA Category Status

IFRA Category	Representative Product Types	Status of Complete Raw Material
Category 1	Lip products	No standalone maximum assigned; constituent assessment required
Category 2	Deodorants and antiperspirants	No standalone maximum assigned; constituent assessment required
Category 3	Eye and facial products	No standalone maximum assigned; constituent assessment required
Category 4	Fine fragrance products	No standalone maximum assigned; constituent assessment required
Category 5A	Leave-on body products	No standalone maximum assigned; constituent assessment required
Category 5B	Leave-on facial products	No standalone maximum assigned; constituent assessment required
Category 5C	Hand-care products	No standalone maximum assigned; constituent assessment required
Category 5D	Baby creams and oils	No standalone maximum assigned; constituent assessment required
Category 6	Oral-care products	No standalone maximum assigned; constituent assessment required
Category 7A	Rinse-off hair products	No standalone maximum assigned; constituent assessment required
Category 7B	Leave-on hair products	No standalone maximum assigned; constituent assessment required
Category 8	Intimate-care products	No standalone maximum assigned; constituent assessment required
Category 9	Rinse-off skin products	No standalone maximum assigned; constituent assessment required
Category 10A	Household products with hand contact	No standalone maximum assigned; constituent assessment required
Category 10B	Air-care sprays and aerosols	No standalone maximum assigned; constituent assessment required
Category 11A	Products with incidental transfer and UV exposure	No standalone maximum assigned; constituent assessment required
Category 11B	Products with incidental transfer without UV exposure	No standalone maximum assigned; constituent assessment required
Category 12	Candles, incense and non-skin-contact products	No standalone maximum assigned; constituent assessment required

Important: The absence of a standalone maximum for the complete raw material must not be interpreted as permission for unlimited use.

AROM OLOGY

Representative IFRA-Relevant Constituents

Constituent	CAS No.	Representative Content (%)	Compliance Relevance
Citronellol	106-22-9	14.80	Sensitisation and specification review
Geraniol	106-24-1	9.60	Sensitisation and specification review
Farnesol	4602-84-0	1.70	Sensitisation and specification review
Eugenol	97-53-0	1.10	Restricted constituent assessment
Linalool	78-70-6	0.80	Oxidation and specification review
Benzyl Alcohol	100-51-6	0.70	Finished-product safety assessment
Geranyl Acetate	105-87-3	0.60	Natural constituent assessment
Methyl Eugenol	93-15-2	0.18	Restricted constituent assessment
Benzyl Benzoate	120-51-4	0.12	Sensitisation assessment
Limonene	5989-27-5	0.08	Oxidation and specification review
Citral	5392-40-5	0.06	Restricted constituent assessment
Isoeugenol	97-54-1	0.04	Restricted constituent assessment
Rose Ketones	Various	Trace	Combined constituent assessment may apply

The values above are representative only.

Conformity Conclusion

Based on representative information:

Rose de Mai Absolute may be used in fragrance formulations under IFRA 51 provided all naturally occurring restricted constituents are calculated and remain within the limits applicable to the intended finished-product category.

This declaration does not provide a universal maximum-use concentration for the complete raw material.

Disclaimer

This document is a representative IFRA 51 raw-material conformity declaration, not an official IFRA-issued Certificate of Conformity.

Before issue, the information must be verified against:

- The original producer's IFRA documentation
- Batch-specific GC-MS data
- Quantitative methyl eugenol information
- Quantitative eugenol and isoeugenol information
- Rose-ketone data where applicable
