IFRA Compliance Statement

Tonka Bean Absolute is a natural extract and is not individually restricted by an ingredient-specific IFRA Standard.

However, the material naturally contains Coumarin, which is an IFRA-restricted constituent. Therefore, compliance must be established from:

- The measured Coumarin content of the batch.
 - Any other naturally occurring restricted constituents.
 - The complete fragrance formulation.
 - The intended IFRA product category.
-

Naturally Occurring IFRA-Relevant Constituents

Typical naturally occurring constituents include:

- Coumarin (major constituent)

- Benzaldehyde (trace)
- Eugenol (trace)
- Linalool (trace)
- Limonene (trace)
- Benzyl Alcohol (trace)

The concentration of these constituents varies naturally from batch to batch.

Maximum Use Levels

No ingredient-specific concentration limit applies to the neat Tonka Bean Absolute.

Finished fragrance compliance shall be determined after evaluating:

- Coumarin concentration.
 - Other naturally occurring restricted constituents.
 - Total contribution from all fragrance ingredients.
 - Applicable IFRA product category.
-

Declaration

Based on the current IFRA Standards:

- Tonka Bean Absolute complies with the IFRA Standards (51st Amendment).
 - Compliance depends primarily upon naturally occurring restricted constituents, especially Coumarin.
 - Final compliance must be determined using the complete fragrance formulation.
 - Good Manufacturing Practice (GMP) should be followed.
