Important Information

AROM O L O G Y

“Not limited” indicates that no maximum concentration has been established for the material under the IFRA Standards, based on the restricted substances assessed within the scope of the certificate. It does not necessarily mean that the material is suitable for unrestricted use in every finished product.

This certificate is based only on substances covered by IFRA Standards for the toxicity endpoints described in the relevant Standards. It does not replace a comprehensive safety assessment of the finished cosmetic, fragrance or consumer product.

The manufacturer of the finished product remains responsible for:

- Determining an appropriate and safe use concentration;
- Assessing the complete finished formulation;
- Considering the contribution of restricted substances from all ingredients;
- Confirming compliance with applicable cosmetic and consumer-product legislation; and
- Conducting any additional safety testing required for the intended application.

For applications outside the listed categories or where the composition of the material differs significantly from the supporting reference documentation, an additional evaluation may be required.
