IFRA STATUS

Osmanthus Absolute is a Natural Complex Substance (NCS) obtained by solvent extraction of the flowers of *Osmanthus fragrans*.

The raw material itself does not have a dedicated IFRA Standard assigning one universal maximum use level. Compliance with the IFRA 51st Amendment must therefore be established by evaluating:

- Batch-specific composition
- Naturally occurring restricted constituents
- Finished fragrance concentration
- Applicable IFRA Product Category
- Combined contribution of restricted constituents from the complete fragrance formula

Commercial IFRA documentation supplied for Osmanthus Absolute similarly bases compliance on the finished formulation and constituent profile.
