Declaration

This certificate confirms that Strawberry Gum Crystals (Natural) are supplied as a natural perfumery raw material intended for incorporation into fragrance compounds.

The material is obtained by natural crystallisation of aromatic constituents derived from *Eucalyptus olida*. It is valued in fine perfumery for its unique sweet strawberry, berry jam and confectionery character.

Based on the IFRA Standards (51st Amendment) and currently available toxicological information, Strawberry Gum Crystals (Natural) (CAS No. 1174404-39-7) are not specifically prohibited or restricted as an individual raw material.

This material may therefore be used in fragrance compounds provided that the finished fragrance complies with the applicable IFRA Standard for the intended product category, taking into account any naturally occurring regulated constituents.

Naturally Occurring IFRA-Relevant Constituents

This material may naturally contain trace quantities of:

- Limonene
- Linalool
- Citral

Concentrations vary naturally according to botanical source and production batch.
