Declaration

This certificate confirms that Styrax Resinoid is supplied as a natural perfumery raw material intended for incorporation into fragrance compounds.

Styrax Resinoid is obtained by solvent extraction of the resin of *Liquidambar styraciflua* and possesses an intensely rich balsamic, sweet, resinous, leathery, smoky and vanilla-like aroma. It is extensively used in amber, leather, incense, oriental, gourmand and woody fragrance accords due to its exceptional fixative properties.

Based on the IFRA Standards (51st Amendment) and currently available toxicological information, Styrax Resinoid (CAS No. 8024-91-1) is not specifically prohibited or restricted as an individual fragrance ingredient.

The material may therefore be used in fragrance compounds provided that the finished fragrance complies with the applicable IFRA Standard for the intended product category, taking into consideration naturally occurring constituents that may be individually regulated.

Naturally Occurring IFRA-Relevant Constituents

This material may naturally contain:

- Benzyl Benzoate
- Benzyl Cinnamate
